Created by Lloyd M. Dunn and Douglas M. Dunn, the assessment is crafted to measure vocabulary comprehension for American English. It is swift and simple to conduct, conserving valuable time so that concentration can be set on applying effective interventions.

The PPVT-4 assessment content covers a wide scope of vocabulary comprehension levels, spanning from pre-kindergarten through adulthood. The evaluation questions broadly feature words that depict 20 topic domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The test gives two identical editions which include different vocabulary items, ensuring that the test-taker has not "learned" the evaluation. One form can be utilized ahead of intervention implementation to measure people's vocabulary understanding and the alternative edition can be utilized for re-assessment to evaluate and record progress. The PPVT-4 also features a special Growth Scale Value (GSV) which is responsive to minor changes with time.
