[The False Promise of Global Learning](#) Alex Standish 2012-04-26 Provides an informed and impassioned critique of the movement for international and global education in schools.

An Ethical Framework for Global Governance for Health Research

Kiarash Aramesh 2019-11-13 This book provides a comprehensive description and ethical analysis of one of the most challenging areas:

international health research. Furthermore, it provides a vivid portrait of the current situation of global governance for health research and its main challenges and suggests a comprehensive and universal ethical framework based on the existing theories and frameworks. This work is a must-read for all the students, scholars, professionals, activists, and policy-makers who are involved or interested in the global health research enterprise and its governance and ethics.

LEARNING WITH ADULTS Leona M. English 2012-12-25 This book is written at a time when our own field of adult education is under assault from a variety of capitalist and neoconservative forces pressuring us... to turn away from the causes of criticality, lifelong learning, and education for freedom. Rather than succumb to these pressures, we have hope that our long term goals of education for life and living can and will be accomplished alongside professional and vocational education. This book offers new insight into what is a very dark moment of our human civilization. From the preface by Dr Carlos Alberto Torres, Professor, GSEIS, Director, Paulo Freire Institute, University of California at Los Angeles The book offers decidedly critical and international perspectives on various aspects of adult education, especially on state, citizenship and neoliberal policies. Critical in both content and method, it is at the same time the part of the collective work needed to advance the Belém call to action by furthering awareness and capacity in the field of adult education. Dr Katarina Popovic, Professor, Universität Duisburg-Essen, University of Belgrade & DBB International, In the midst of diminishing resources and growing inequalities, English and Mayo provide an incisive and much needed critique of adult education in ways that highlight not only its historical and philosophical roots but also its major significance to the practice of democracy. In a direct challenge to the neoliberal accountability craze, Learning with Adults offers a rigorous political reading of the field—one that systematically challenges oppressive educational policies and practices, while affirming an emancipatory vision of civic engagement. Truly an informative treatise that sheds new light on the education of adults. Dr Antonia Darder Professor & Leavey Presidential Endowed Chair in Education Loyola Marymount University Los Angeles Leona English and Peter Mayo challenge hegemonic assumptions and ideas, while offering a constructive alternative based on the principle of working with learners and not just for them. Their analysis is accessible enough for newcomers to the field, while the authors' wide-ranging coverage and radical approach provide refreshing and challenging messages for the most experienced adult educator. Up-to-date, genuinely international and passionately committed, Learning with Adults is a great

book. Dr John Field, Professor, University of Stirling Cover design by Annemarie Mayo

Towards responsible and inclusive financing of the palm oil sector
Kusumaningtyas, R. 2017-10-04 The global palm oil sector faces ongoing threats to sustainability caused by deforestation, peatland development, labor rights violations and land right conflicts. Additionally, integrating smallholders into sustainable palm oil supply chains continues to be a challenge for the industry. Financial service providers (FSPs) could play a role in stimulating sustainability commitments from the palm oil companies they finance. Their potential influence stems from their capacity to set environmental, social and governance (ESG) conditions for financial services. This research shows that European and US FSPs are further along than their counterparts in Asia in adopting policies that include ESG risk assessments as part of the process for providing financial services. However, attention to smallholder inclusion is insufficient in the policies of all FSPs included in this report. Differences between European and US versus Asian FSPs in adopting ESG standards, as well as the unique markets they finance, present a risk that two parallel but separate financial systems could emerge. Efforts by both government and nongovernmental organizations should emphasize the prevention of a two-tiered marketplace with different quality requirements for palm oil. All actors in this sector still require a significant shift in thinking on the benefits of including ESG standards in cultivation and production processes. In palm oil producing countries, the lack of specific banking regulations emphasizing sustainability concerns regarding the sector forms a further hindrance to positive developments.

Integration in the Southern African Development Community Region Korwa Gombe Adar 2023 Using political and public administration perspectives, this book argues that for democratization and integration to be consolidated and institutionalized, direct involvement of the people of Southern Africa is paramount. Democratization and integration are about people, the sovereigns, and not merely the abstract actors called nation states.

The World Community and the Arab Spring Cenap Çakmak 2018-07-26

This edited volume offers an understanding of how the international community, as a collection of significant actors including major states and intergovernmental institutions, has responded to the important political and social development of the Arab Spring. Contributors analyze the response by international organizations (UN, EU, NATO), big powers (US, Russia, China, UK), regional powers (Turkey, Iran, Israel, Saudi Arabia) and small powers (Kuwait, Qatar). The book thus makes a sound contribution to the existing literature on the Arab Spring in form of foreign policy analysis and provides an overview of the current shape and outlook of global politics.

Protecting the Arctic Great Britain: Parliament: House of Commons: Environmental Audit Committee 2012-09-20 This report calls for a halt on Arctic oil drilling until: a pan-Arctic oil spill response standard is in place; a stricter financial liability regime for oil and gas operations is introduced that requires companies to prove that they can meet the costs of cleaning up; an oil and gas industry group is set up to peer-review companies' spill response plans and operating practices, reporting publicly; further independent research and testing on oil spill response techniques in Arctic conditions is conducted, including an assessment of their environmental side-effects; an internationally recognised environmental sanctuary is established in at least part of the Arctic. Drilling is only currently feasible in the Arctic during a short summer window and if a blow-out occurred just before the dark Arctic winter returned it may not be possible to cap it until the following summer - potentially leaving oil spewing out under the ice for six months or more with devastating consequences for wildlife. This report also warns that a collapse in summer Arctic sea-ice, increased methane emissions from thawing permafrost, melting of the Greenland ice-sheet and changes to the thermo-haline circulation could all have disastrous consequences for the world - pushing up sea levels and transforming weather patterns. Temperature rises in the Arctic are already affecting the UK's weather. The report points out that there are already more proven fossil fuel reserves in the world than can be burnt safely and calls on the Government to rethink its approach to combating climate change by tackling the supply of fossil fuels, as well as demand

Handbook of the Politics of the Arctic Leif Christian Jensen 2015-09-25 The Arctic has again become one of the leading issues on the international foreign policy agenda, in a manner unseen since the Cold War. Drawing on the perspectives of geo-politics and international law, this Handbook offers fresh insights and perspectives on the most pressing issues, grouped under the headings of political ascendancy, climate and environmental issues, resources and energy, and the response and policies of affected countries.

Handbook on Geopolitics and Security in the Arctic Joachim Weber 2020-06-25 Against the backdrop of climate change and tectonic political shifts in world politics, this handbook provides an overview of the most crucial geopolitical and security related issues in the Arctic. It discusses established shareholder's policies in the Arctic - those of Russia, Canada, the USA, Denmark, and Norway - as well as the politics and interests of other significant or future stakeholders, including China and India. Furthermore, it explains the economic situation and the legal framework that governs the Arctic, and the claims that Arctic states have made in order to expand their territories and exclusive economic zones. While illustrating the collaborative approach, represented by institutions such as the Arctic council, which has often been described as an exceptional institution in this region, the contributing authors examine potential resource and power conflicts between Arctic nations, due to competing interests. The authors also address topics such as changing alliances between Arctic nations, new sea lines of communication, technological shifts, and eventually the return to power politics in the area. Written by experts on international security studies and the Arctic, as well as practitioners from government institutions and international organizations, the book provides an invaluable source of information for anyone interested in geopolitical shifts and security issues in the High North.

The Digitalisation of African Agriculture Report 2018-2019 Tsan, Michael 2019-06-30 An inclusive, digitally-enabled agricultural transformation could help achieve meaningful livelihood improvements for Africa's smallholder farmers and pastoralists. It could drive greater engagement in

agriculture from women and youth and create employment opportunities along the value chain. At CTA we staked a claim on this power of digitalisation to more systematically transform agriculture early on. Digitalisation, focusing on not individual ICTs but the application of these technologies to entire value chains, is a theme that cuts across all of our work. In youth entrepreneurship, we are fostering a new breed of young ICT 'agripreneurs'. In climate-smart agriculture multiple projects provide information that can help towards building resilience for smallholder farmers. And in women empowerment we are supporting digital platforms to drive greater inclusion for women entrepreneurs in agricultural value chains.

Communicating Climate-Change and Natural Hazard Risk and Cultivating Resilience Jeanette L. Drake 2015-11-05 This edited volume emphasizes risk and crisis communication principles and practices within the up-to-the-minute context of new technologies, a new focus on resiliency, and global environmental change. It includes contributions from experts from around the globe whose research, advocacy, teaching, work, or service in the natural or social sciences deals with risk communication and/or management surrounding natural and technological disasters, with a particular focus on climate change-related phenomena. Resilience and good communication are intimately linked and with climate change precipitating more numerous and onerous weather-related catastrophes, a conversation on resilience is timely and necessary. The goal is robust communities that are able to withstand the shock of disaster. Communicating well under ordinary circumstances is challenging; communicating during a crisis is extraordinarily difficult. This book is dedicated to all those who have directly or indirectly suffered the effects of climate change and extreme events with the hope that the advance of knowledge, implementation of sound science and appropriate policies and use of effective communication will help in reducing their vulnerability while also improving resilience in the face of often devastating natural

and technological disasters.

Governing Arctic Seas: Regional Lessons from the Bering Strait and Barents Sea Oran R. Young 2020-01-02 *Governing Arctic Seas* introduces the concept of ecopolitical regions, using in-depth analyses of the Bering Strait and Barents Sea Regions to demonstrate how integrating the natural sciences, social sciences and Indigenous knowledge can reveal patterns, trends and processes as the basis for informed decisionmaking. This book draws on international, interdisciplinary and inclusive (holistic) perspectives to analyze governance mechanisms, built infrastructure and their coupling to achieve sustainability in biophysical regions subject to shared authority. *Governing Arctic Seas* is the first volume in a series of books on *Informed Decisionmaking for Sustainability* that apply, train and refine science diplomacy to address transboundary issues at scales ranging from local to global. For nations and peoples as well as those dealing with global concerns, this holistic process operates across a 'continuum of urgencies' from security time scales (mitigating risks of political, economic and cultural instabilities that are immediate) to sustainability time scales (balancing economic prosperity, environmental protection and societal well-being across generations). Informed decisionmaking is the apex goal, starting with questions that generate data as stages of research, integrating decisionmaking institutions to employ evidence to reveal options (without advocacy) that contribute to informed decisions. The first volumes in the series focus on the Arctic, revealing legal, economic, environmental and societal lessons with accelerating knowledge co-production to achieve progress with sustainability in this globally-relevant region that is undergoing an environmental state change in the sea and on land. Across all volumes, there is triangulation to integrate research, education and leadership as well as science, technology and innovation to elaborate the theory, methods and skills of informed decisionmaking to build common interests for the benefit of all on Earth.

Syria Divided Ora Szekely 2023-08-15 The civil war in Syria—which has claimed more than 600,000 lives and displaced over half of the country's population since 2011—is an enormously complex conflict. The

combatants include a wide array of state and nonstate forces, both Syrian and international. Adding to the war's complexity, its many participants understand and explain the war in a range of different ways. For some, it is a fight for dignity and democracy; for others, a sectarian or communal conflict; still others see it as a fight against terrorism or a consequence of foreign interference. Ora Szekely draws on sources including in-depth interviews, conflict data, and propaganda distributed through social media to examine how these competing narratives have shaped the course of the conflict. Mapping out the broad patterns of violence among combatants and against civilians, Szekely argues that the competition to control the narrative in the eyes of important audiences at home and abroad has not only influenced the choices of participants, it has also—shaped in part by the use of social media—led many to treat warfare as a kind of performance. An insightful analysis of the forces fueling a brutal civil war, *Syria Divided* offers new perspectives on the performative aspects of violence, the weaponization of social media, and key features of twenty-first-century warfare.

International Social Work Lynne Moore Healy 2020 "International Social Work: Professional Action in an Interdependent World, Third Edition, is a comprehensive treatment of all dimensions of international social work. The authors' four-part definition of international social work provides a framework and includes domestic practice and policy influenced by global forces, professional exchange, international practice and global social policy. The dual themes of globalization and professional action are emphasized. The first section of the book explores globalization, development and human rights as foundational concepts for international social work. It then provides an overview of global social issues and international organizations related to social welfare. Overviews of the global history of the profession and of selected examples of the profession's role in international action are provided. Similarities and differences in social work around the world are then examined through seven country examples"--

Coarseness in U.S. Public Communication Philip Dalton 2012-08-31 Proceeding from the assumption that all manner of public communication

in the United States is becoming increasingly coarse, this book argues that shared cultural notions of decency are being eroded by market logic—a decision making calculus based solely upon the aggregate preferences of self-interested individuals.

The Dynamics of Conflict Bernard S. Mayer 2012-01-20 *The Dynamics of Conflict* When it was published in 2000, Bernie Mayer's *The Dynamics of Conflict Resolution* quickly became one of the seminal works in the conflict resolution field. The book bridged the gap between abstract theoretical approaches and practical handbooks and became an immensely valuable and accessible resource for experienced and novice practitioners, as well as for professors and students of conflict management who needed a deep yet practical view of conflict and methods for dealing with it. *The Dynamics of Conflict* is the second edition of Mayer's classic book. While building on the strengths of the first edition, this thoroughly revised and updated book keeps pace with the most current trends and research in the field and explores four key concepts: interactional dynamics, system dynamics, culture and conflict, and conflict engagement. Like the first edition, the focus of the new edition is on the ways we can productively think about conflict and conflict

intervention, rather than on specific techniques and processes. Mayer presents ideas about conflict as a set of conceptual tools that build on one another and contribute to a multifaceted view of conflict and conflict intervention but that also stand on their own. Filled with illustrative examples, the book draws from the author's thirty years of experience with interpersonal, family, community, organizational, labor management, environmental, public policy, and international disputes and includes instances of conflicts that have been in the news. In addition, this vital resource contains information on the most important work that has been done in the past decade on culture, systems, and conflict engagement and shows how conflict concepts apply to new technologies such as online communication and conflict resolution efforts on the Web. In the concluding chapter Mayer explores how conflict intervention efforts fit into more general values about peace, democracy, and social justice, and the personal impact that conflict work as a field has on conflict specialists.

United States Department of State Treaties in Force; A List of Treaties and Other International Agreements of the United States in Force on January 1, 2018

The History of Music Production Richard James Burgess 2014-06-25 In *The History of Music Production*, Richard James Burgess draws on his experience as a producer, musician, and author. Beginning in 1860 with the first known recording of an acoustic sound and moving forward chronologically, Burgess charts the highs and lows of the industry throughout the decades and concludes with a discussion on the present state of music production. Throughout, he tells the story of the music producer as both artist and professional, including biographical sketches of key figures in the history of the industry, including Fred Gaisberg, Phil Spector, and Dr. Dre. Burgess argues that while technology has defined the nature of music production, the drive toward greater control over the process, end result, and overall artistry come from producers. The result is a deeply knowledgeable book that sketches a critical path in the evolution of the field, and analyzes the impact that recording and disseminative technologies have had on music production. A key and handy reference book for students and scholars alike, it stands as an ideal

companion to Burgess's noted, multi-edition book *The Art of Music Production*.

Beginning PHP, Apache, MySQL Web Development Michael K. Glass 2004-03-01 What is this book about? The Oxford Companion to Cheese Catherine W. Donnelly 2016 Winner of the 2017 James Beard Award for Reference & Scholarship The discovery of cheese is a narrative at least 8,000 years old, dating back to the Neolithic era. Yet, after all of these thousands of years we are still finding new ways to combine the same four basic ingredients - milk, bacteria, salt, and enzymes - into new and exciting products with vastly different shapes, sizes, and colors, and equally complex and varied tastes, textures, and, yes, aromas. In fact, after a long period of industrialized,

processed, and standardized cheese, cheesemakers, cheesemongers, affineurs, and most of all consumers are rediscovering the endless variety of cheeses across cultures. The Oxford Companion to Cheese is the first major reference work dedicated to cheese, containing 855 A-Z entries on cheese history, culture, science, and production. From cottage cheese to Camembert, from Gorgonzola to Gruyère, there are entries on all of the major cheese varieties globally, but also many cheeses that are not well known outside of their region of production. The concentrated whey cheeses popular in Norway, brunost, are covered here, as are the traditional Turkish and Iranian cheeses that are ripened in casings prepared from sheep's or goat's skin. There are entries on animal species whose milk is commonly (cow, goat, sheep) and not so commonly (think yak, camel, and reindeer) used in cheesemaking, as well as entries on a few highly important breeds within each species, such as the Nubian goat or the Holstein cow. Regional entries on places with a strong history of cheese production, biographies of influential cheesemakers, innovative and influential cheese shops, and historical entries on topics like manorial cheesemaking and cheese in children's literature round out the Companion's eclectic cultural coverage. The Companion also reflects a fascination with the microbiology and chemistry of cheese, featuring entries on bacteria, molds, yeasts, cultures, and coagulants used in cheesemaking and cheese maturing. The blooms, veins, sticky surfaces, gooey interiors, crystals, wrinkles, strings, and yes, for some, the odors of cheese are all due to microbial action and growth. And today we have unprecedented insight into the microbial complexity of cheese, thanks to advances in molecular biology, whole-genome sequencing technologies, and microbiome research. The Companion is equally interested in the applied elements of cheesemaking, with entries on production methodologies and the technology and equipment used in cheesemaking. An astonishing 325 authors contributed entries to the Companion, residing in 35 countries. These experts included cheesemakers, cheesemongers, dairy scientists, anthropologists, food historians, journalists, archaeologists, and on, from backgrounds as diverse as the topics they write about. Every entry is signed by the author, and includes

both cross references to related topics and further reading suggestions. The endmatter includes a list of cheese-related museums and a thorough index. Two 16-page color inserts and well over a hundred black and white images help bring the entries to life. This landmark encyclopedia is the most wide-ranging, comprehensive, and reliable reference work on cheese available, suitable for both novices and industry insiders alike.

The Political Economy of Universal Healthcare in Africa Philip C. Aka 2022-04-28 The global rise in pandemics, most recently COVID-19, and other health challenges, some of which are due to climate change, have imposed significant challenges on the healthcare systems in economies around the world. Thus, this book deals with an issue that is very timely and relevant, not just in Africa but globally. It critically assesses healthcare reforms in Ghana under the Fourth Republic, since 1993. Although it focuses on Ghana's National Health Insurance Scheme of 2003, the book instructively goes beyond this program. The book argues that, although Ghana is a bellwether of healthcare reforms in Africa, its healthcare initiatives are still far from the service haven of healthcare as a human right. Themes that animate the book's argument include the need to translate human rights law, such as the right to health, into practical policies that work for ordinary citizens. Key highlights of the book include an increased accent on health as a human right, emphasis on comparative analysis in healthcare studies, and the formulation of a four-hallmark framework, embedded in economics, law, politics, and human rights, to act as a guide for assessment of healthcare reforms in Africa in particular, and Ghana more specifically. Using Ghana as a case study and analytical window into the world, the book offers a valuable and timely resource for academics, students and policymakers across the disciplines of development and healthcare economics, law, public policy, political science, sociology, and African and Caribbean studies, as well as in various fields in health science.

The Future of Work in the Nordic countries: Opportunities and Challenges for the Nordic Working Life Models Alsos, Kristin 2021-05-06 Available online: <https://pub.norden.org/temanord2021-520/> Major changes in technology, economic contexts, workforces and the institutions of work

have ebbed and flowed since well before the first industrial revolution in the 18th century. However, many argue that the changes we are currently facing are different, and that the rise of digitalized production will entirely transform our ways and views of working. In this collaborative project, funded by the Nordic Council of Ministers, researchers from the five Nordic countries have studied how the ongoing transformations of production and labour markets associated with digitalization, demographic change and new forms of employment will influence the future of work in the Nordic countries.

Transformative Constitutionalism in Latin America Armin von Bogdandy 2017 This ground-breaking collection of essays outlines and explains the unique development of Latin American jurisprudence. It introduces the idea of the *Ius Constitutionale Commune en America Latina* (ICCAL), an original Latin American path of transformative constitutionalism, to an Anglophone audience for the first time. It charts the key developments that have transformed the region and assesses the success of the constitutional projects that followed a period of authoritarian regimes in Latin America. Coined by scholars who have been documenting, conceptualizing, and comparing the development of Latin American public law for more than a decade, the term ICCAL encompasses themes that cross national borders and legal fields, taking in constitutional law, administrative law, general public international law, regional integration law, human rights, and investment law. Not only does this volume map the legal landscape, it also suggests measures to improve society via due legal process and a rights-based, supranational and regionally rooted constitutionalism. The editors contend that with the strengthening of democracy, the rule of law, and human rights, common problems such as the exclusion of wide sectors of the population from having a say in government, as well as corruption, hyper-presidentialism, and the weak normativity of the law can be combatted more effectively in future.

Observing' the Arctic Chih Y. Woon 2020-08-28 Addressing the growing economic, political, and cultural presence of Asian states in the Arctic region, this timely book looks at how that presence is being evaluated and engaged with by Arctic states and their northern communities. A diverse

range of authors addresses the question that underpins so much of this interest in Asian engagement with the northern latitudes: what do Asian countries want to gain from the Arctic?

National Identity and Educational Reform Elizabeth Anderson Worden 2014-02-18 National identity in Moldova remains contested despite repeated attempts by governments, historians, and educators to cultivate a shared sense of national belonging through the development of history textbooks. Concern over professional status and distrust of the government's motivations halted these reforms, demonstrating that the success of such efforts greatly depends on teachers' and citizens' social memory and everyday lives. This volume looks at educational reform and the struggle over national identity in the history classroom from the perspectives of five different groups: elected politicians, Ministry of Education officials, textbook authors and historians, teachers, and students. Each chapter explores the actors' motivations and agendas regarding reform, their role in promoting or obstructing the reform process, and their opinions about the ensuing controversy. Drawing on months of fieldwork and original research, author Elizabeth Worden examines the importance of teachers and students in the success or failure of a reform initiative.

Measuring International Authority Liesbet Hooghe 2017 This book sets out a measure of authority for seventy-six international organizations (IOs) from 1950, or the time of their establishment, to 2010 which can allow

researchers to test expectations about the character, sources, and consequences of international governance. The international organizations considered are regional (e.g. the EU, Andean Community, NAFTA), cross-regional (e.g. Commonwealth of Nations, the Organization of Islamic Cooperation), and global (e.g. the UN, World Bank, WTO). Firstly, the book introduces carefully constructed estimates for the scope and depth of authority exercised by international governments. The estimates are unique in their comparative scope, their specificity, and time span. Secondly, it describes describe broad trends in IO authority by comparing delegation and pooling, over time, across IOs, and across decision areas. Thirdly, it presents the evidence gathered by the authors to estimate international authority by carefully discussing forty-seven international organizations, and showing how their bodies are composed, what decisions each body makes, and how they make decisions.

Handbook of Regional Conflict Resolution Initiatives in the Global South Jeronimo Delgado-Caicedo 2022-07-28 During the first half of the twentieth century, the international system was largely dominated by the USA and the colonial powers of western Europe. After the two world wars, the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics. However, as it is the norm in the international system, power structures are not immutable. After the end of the Cold War, rapid changes to the existing

international hierarchies took place, as new countries from the so-called “developing world” began to emerge as crucial actors capable of questioning and altering the power dynamics of the world. It is therefore unthinkable to ignore emerging countries such as Russia, the People’s Republic of China, India, Brazil or South Africa in the decision-making process in today’s world order. In addition, there is a group of smaller, yet increasingly important countries that, while acknowledging their inability radically to change the rules of the international system, are still eager to shift power relations and enhance their influence in the world. Argentina, Colombia, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, Saudi Arabia, Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South. While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions, previous analyses have focused primarily on the impact that emerging powers have had in their own regions’ conflict resolution initiatives. This volume, instead, aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers. In other words, this book explores the relation between a country’s involvement in conflict resolution initiatives and its positioning in the international system. The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South, particularly from states that have strengthened - or sometimes weakened - their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives.
