The Worldwide Guide to Movie Locations Tony Reeves 2001 For all those fans who wonder where their favorite movies were filmed or what it would be like to visit the sites, this book is the ultimate resource. It features information on blockbuster, cult, and art

house favorites from Saturday Night Fever to Men in Black, from Belle du Jour to Ben Hur. The entries for individual films include brief descriptions of key scenes shot at the location, travel details, photographs, film stills, behind-the-scenes information, and insights as to what these places are really like. Also included are

full-color features on major sites of special interest—Vertigo’s San Francisco, Woody Allen’s Manhattan, and a world Star Wars tour, among others—along with more obscure locations that have become sought-after travel destinations simply because of their connection to the movies.

Practical Web Design for Absolute Beginners Adrian W. West 2016-11-17 Learn the fundamentals of modern web design, rather than relying on CMS programs, such as WordPress or Joomla!. You will be introduced to the essentials of good design and how to optimize for search engines. You will discover how to register a domain name and migrate a website to a remote host. Because you will have built the web pages yourself, you will know exactly how HTML and CSS work. You will have complete control over your websites and their maintenance. *Practical Website Design for Absolute Beginners* centers around introducing small amounts of new code in short practical chapters and provides many website templates that can be easily adapted for your own websites. Each chapter builds on the templates created in the previous chapter. You are provided with a practical project to complete in most chapters, and taught to produce practical web pages right from the start. In the first chapter you will install and configure a free text editor, then you will produce the structure for your first web page. You will then gradually learn to create more sophisticated and increasingly practical web pages and websites. In this book you will be encouraged by means of a series of achievable goals, and you will be rewarded by the knowledge that you are learning something valuable and really worthwhile. You will not have to plow through daunting chapters of disembodied code theory because the code is described and explained in context within each project. Because each project is fully illustrated, you will see clearly what you are expected to achieve as you create each web page. What You'll Learn Provides instructions for installing a text editor for producing HTML and CSS Shows you step-by-step how to build and test web pages and websites Teaches you how to ensure

that your websites are attractive and useful Describes how to make the most effective use of color and images Teaches you the essential features of search engine optimization Shows you how to migrate your website to a remote host Who This Book Is For *Practical Website Design for Absolute Beginners* is for people who want to begin designing their own websites. It uses a highly motivational, easily assimilated step-by-step approach where you will start learning practical skills from the very first chapter. The book is an excellent choice for people who have computer skills but would also like to learn HTML and CSS. For readers who have little or no knowledge of HTML and CSS, the book will teach enough to complete all the projects in the book.

Advanced Theory and Practice in Sport Marketing Eric Schwarz 2010-05-14 Advanced Theory and Practice in Sport Marketing is the first book to address this increasingly popular subject at an advanced level. Where existing sport marketing texts restate concepts learned at an introductory marketing level, this book goes beyond, by expanding the knowledge of the student with advanced marketing theory which is specifically related to the crucial areas in sport marketing. Advanced Theory and Practice in Sport Marketing is vital reading for any sport marketing student wishing to progress their knowledge and take their understanding of the industry to the next level.

New England English James N. Stanford 2019 For nearly 400 years, New England has held an important place in the development of American English, and "New England accents" are very well known in the popular imagination. While other projects have studied various dialect regions of New England, this is the first large-scale academic project since the 1930s to focus specifically on New England English as a whole. In New England English, James N. Stanford presents new variationist sociolinguistic research covering all six New England states, with detailed geographic, acoustic phonetic, and statistical analyses of recently collected data from over 1,600 New Englanders. Stanford and his team of Dartmouth students built this dataset over 8 years of face-to-face fieldwork and online audio recordings and questionnaires. Using acoustic phonetics, computational processing, and dialect maps, the book systematically documents major traditional New England dialect features and their current usage in terms of geography, age, gender, ethnicity, social class, and other factors. This dataset is interpreted in terms of William Labov's outward orientation of the language faculty, dialect levelling, convergence and divergence, and "Hub social geometry." The result is a wide-

ranging empirical analysis and theoretical overview of this influential English dialect region.

On Holiday with God Sue Pickering 2012 Are you seeking a quiet place or time for silence in your busy life? This unique guide will help you make a personal retreat in the Christian tradition, either at home or away, alone or with others, teaching you essential skills for finding God's presence, guided spiritual exercises for your time on retreat, and advice on readjusting afterwards.

Pro PHP Refactoring Francesco Trucchia 2011-01-10 Many businesses and organizations depend on older high-value PHP software that risks abandonment because it is impossible to maintain. The reasons for this may be that the software is not well designed; there is only one developer (the one who created the system) who can develop it because he didn't use common design patterns and documentation; or the code is procedural, not object-oriented. With this book, you'll learn to identify problem code and refactor it to create more effective applications using test-driven design.

Library and Information Studies for Arctic Social Sciences and Humanities Spencer Acadia 2020-11-26 Library and Information Studies for Arctic Social Sciences and Humanities serves as a key interdisciplinary title that links the social sciences and humanities with current issues, trends, and projects in library, archival, and information sciences within shared Arctic frameworks and geographies. Including contributions from professionals and academics working across and on the Arctic, the book presents recent research, theoretical inquiry, and applied professional endeavours at academic and public libraries, as well as archives, museums, government institutions, and other organisations. Focusing on efforts that further Arctic knowledge and research, papers present local, regional, and institutional case studies to conceptually and empirically describe real-life research in which the authors are engaged. Topics covered include the complexities

of developing and managing multilingual resources; working in geographically isolated areas; curating combinations of local, regional, national, and international content collections; and understanding historical and contemporary colonial-industrial influences in indigenous knowledge. Library and Information Studies for Arctic Social Sciences and Humanities will be essential reading for academics, researchers, and students working the fields of library, archival, and information or data science, as well as those working in the humanities and social sciences more generally. It should also be of great interest to librarians, archivists, curators, and information or data professionals around the globe.

Race, Class, and Politics in the Cappuccino City Derek S. Hyra 2017-04-17 For long-time residents of Washington, DC's Shaw/U Street, the neighborhood has become almost unrecognizable in recent years. Where the city's most infamous open-air drug market once stood, a farmers' market now sells grass-fed beef and homemade duck egg ravioli. On the corner where AM.PM carryout used to dish out soul food, a new establishment markets its \$28 foie gras burger. Shaw is experiencing a dramatic transformation, from "ghetto" to "gilded ghetto," where white newcomers are rehabbing homes, developing dog parks, and paving the way for a third wave coffee shop on nearly every block. *Race, Class, and Politics in the Cappuccino City* is an in-depth ethnography of this gilded ghetto. Derek S. Hyra captures here a quickly gentrifying space in which long-time black residents are joined, and variously displaced, by an influx of young, white, relatively wealthy, and/or gay professionals who, in part as a result of global economic forces and the recent development of central business districts, have returned to the cities earlier generations fled decades ago. As a result, America is witnessing the emergence of what Hyra calls "cappuccino cities." A cappuccino has essentially the same ingredients as a cup of coffee with milk, but is considered upscale,

and is double the price. In Hyra's cappuccino city, the black inner-city neighborhood undergoes enormous transformations and becomes racially "lighter" and more expensive by the year.

Handbook of Regional Conflict Resolution Initiatives in the Global South

Jeronimo Delgado-Caicedo 2022-07-28 During the first half of the twentieth century, the international system was largely dominated by the USA and the colonial powers of western Europe. After the two world wars, the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics. However, as it is the norm in the international system, power structures are not immutable. After the end of the Cold War, rapid changes to the existing international hierarchies took place, as new countries from the so-called "developing world" began to emerge as crucial actors capable of questioning and altering the power dynamics of the world. It is therefore unthinkable to ignore emerging countries such as Russia, the People's Republic of China, India, Brazil or South Africa in the decision-making process in today's world order. In addition, there is a group of smaller, yet increasingly important countries that, while acknowledging their inability radically to change the rules of the international system, are still eager to shift power relations and enhance their influence in the world.

Argentina, Colombia, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, Saudi Arabia, Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South. While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions, previous analyses have focused primarily on the impact that emerging powers have had in their own regions' conflict resolution initiatives. This volume, instead, aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers. In other words, this book explores the relation between a country's involvement in

conflict resolution initiatives and its positioning in the international system. The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South, particularly from states that have strengthened - or sometimes weakened - their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives.

The Cambridge Companion to the Australian Novel Nicholas Birns 2023-02-28

The Cambridge Companion to the Australian Novel provides a clear, lively, and accessible account of the novel in Australia. The chapters of this book survey significant issues and developments in the Australian novel, offer historical and conceptual frameworks, and provide vivid and original examples of what reading an Australian novel looks like in practice. The book

begins with novels by literary visitors to Australia and concludes with those by refugees. In between, the reader encounters the Australian novel in its splendid contradictoriness, from nineteenth-century settler fiction by women writers through to literary images of the Anthropocene, from sexuality in the novels of Patrick White to Waanyi writer Alexis Wright's call for a sovereign First Nations literature. This book is an invitation to students, instructors, and researchers alike to expand and broaden their knowledge of the complex histories and crucial present of the Australian novel.

Becoming Socialized in Student Affairs Administration

Ashley Tull 2023-07-03 Effective socialization of new student affairs professionals is essential—both for the individual success of these practitioners, and for the work of a college or university that promotes student learning. It enables new professionals to manage the important personal and professional transitions they experience throughout their careers, engage in continuous professional development, and achieve high levels of productivity. It also counteracts the high attrition rate among new hires, with all the attendant costs to the institution in terms of resources spent on recruiting, hiring, training, supervising, and developing staff talent. The socialization process for new professionals includes formal and informal elements that influence both success and quality of work life. This process is far more complex than a single orientation program organized by a unit or division. Rather, it is a comprehensive process where both the new professional and organization learn about and from each other in ways that influence working relationships and individual and organizational outcomes. Part I of this book defines the concept, explains its value, and offers a model of socialization. Part II examines the institutional context in which the socialization of new professionals occurs, and describes how different institutional types influence the socialization process. It considers the changing characteristics of college students, and how these impact the work of student affairs. In addressing the extra-institutional and professional

contexts, Part III considers the role that graduate education plays in preparing new professionals for work in student affairs, and offers guidance to faculty and practitioners involved in graduate education about what they can do to introduce graduate students to professional life. It addresses the importance of professional orientation activities, the roles of supervision and mentorship, as well as the impact of peers and institutions on the socialization process. It concludes with a discussion of the role and importance of professional associations. This book is intended for graduate program faculty, for senior student affairs officers concerned about developing and retaining the new staff, and for administrators and leaders in student affairs shaping the future of the profession. For new professionals themselves it offers insights on the path to professionalization.

Religion and Ethics in the Neonatal Intensive Care Unit Ronald M. Green 2019 Each year, neonatal Intensive care units (NICUs) in the U.S. and around the world help thousands of sick or premature newborns survive. NICUs are committed to the ideals of family-centered care, which encourages shared decision-making between parents and NICU caregivers. In cases of infants with conditions marked by high mortality, morbidity, or great suffering, family-centered care affirms the right of parents to assist in making decisions regarding aggressive treatment for their infant. Often, these parents' difficult and intimate decisions are shaped profoundly by their religious beliefs. In light of this, what precisely are the teachings of the major world religious traditions about the status and care of the premature or sick newborn? Few studies have grappled with what major religious traditions teach about the care of the newborn or how these teachings may bear on parents' decisions. This volume seeks to fill this gap, providing information on religious teachings about the newborn to the multidisciplinary teams of NICU professionals (neonatologists, advance practice nurses, social workers), as well as to parents of NICU patients, and students of bioethics. In chapters dealing with Judaism, Catholicism, Denominational Protestantism, Evangelical Protestantism, African American Protestantism, Sunni and Shi'a Islam, Hinduism, Buddhism, Navajo religion, and Seventh Day Adventism, leading scholars develop the teachings of these traditions on the status, treatment, and ritual accompaniments of care of the premature or sick newborn. This is an essential book that will serve as a first resort for clinicians who need to understand the religious dynamics influencing anyone making a difficult decision about her sick newborn.

Reinventing Ourselves: Contemporary Concepts of Identity in Virtual Worlds Anna Peachey 2011-07-07 The proposed book explores the theme of identity, specifically as applied to its role and development in virtual worlds. Following the introduction, it is divided into four sections: identities, avatars and the relationship between them; factors that support the development of identity in virtual worlds; managing multiple identities across different environments and creating an online identity for a physical world purpose.

Military Review 2012

Housing as Intervention Karen Kubey 2018-07-30 Across the world, the housing crisis is escalating. Mass migration to cities has led to rapid urbanisation on an unprecedented scale, while the withdrawal of public funding from social housing provision in Western countries, and widening income inequality, have further compounded the situation. In prosperous US and European cities, middle- and low-income residents are being pushed out of housing markets increasingly dominated by luxury investors. The average London tenant, for example, now pays an unaffordable 49 per cent of his or her pre-tax income in rent. Parts of the developing world and areas of forced migration are experiencing insufficient affordable housing stock coupled with rapidly shifting ways of life. In response to this context, forward-thinking architects are taking the lead with a collaborative approach. By partnering with allied fields, working with residents, developing new forms of housing, and leveraging new funding systems and policies, they are providing strategic leadership for what many consider to be our cities' most pressing crisis. Amidst growing economic and health disparities, this issue of AD asks how housing projects, and the design processes behind them, might be interventions towards greater social equity, and how collaborative work in housing might reposition the architectural profession at large. Education for Sustainable Happiness and Well-Being Catherine O'Brien 2016-04-14 In this innovative and cogent presentation of her concept of sustainable happiness, Catherine O'Brien outlines how the leading recommendations for transforming education can be integrated within a vision of well-being for all. Solution-focused, the book demonstrates how aspects of this vision are already being realized, and the potential for accelerating education transitions that enable people and ecosystems to flourish. Each chapter assists educators to understand how to apply the lessons learned, both personally and professionally. The aim is to support educators to experience themselves as change-makers with growing confidence to implement new teaching strategies and inspire their students to become change-makers as well—engaged in deep learning that develops character, connections with life,

and invigorating collaborations that revitalize the very purpose of education.

The Routledge Handbook of English Language Teaching

Graham Hall 2016-05-12 The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter.

Culturematic Grant McCracken 2012-04-24 Welcome to Culturematic: How Reality TV, John Cheever, a Pie Lab, Julia Child, Fantasy Football, Burning Man, the Ford Fiesta Movement, Rube Goldberg, NFL Films, Wordle, Two and a Half Men, a 10,000-Year Symphony, and ROFLCom Memes Will Help You Create and Execute Breakthrough Ideas A Culturematic is a little machine for making culture. It's an ingenuity engine. Once wound up and released, the Culturematic acts as a probe into the often-alien world of contemporary culture, to test the atmosphere, to see what life it can sustain, to see who responds and how. Culturematics start small but can scale up ferociously, bootstrapping themselves as they go. Because they are so inexpensive, we can afford to fire off a multitude of Culturematics simultaneously. This is evolutionary strategy, iterative innovation, and rapid prototyping all at once. Culturematics are fast, cheap, and out of control. Perhaps as important, they fail early and often. They are the perfect antidote to a world where we cannot guess what's coming next. In Culturematic, anthropologist Grant McCracken describes these little machines and helps the reader master them. Examples are drawn from NFL Films, Twitter, the

Apple Genius Bar, Starbucks, Ford, SNL Digital Shorts, Restoration Hardware, UNICEF, J. Crew, Pie Lab, USA Network, and the GEICO gecko. For the traditional producers of culture—the creators of movies, design, advertising, publishing, magazines, newspapers, and corporate R&D—this book will inspire new innovation and creativity. For the emerging producers of culture—the digital players—this book will serve as a practical handbook.

The book also explores how outward investment strategies contribute to building internationally competitive MNEs.

The Worlds of Dune Tom Huddleston 2023-09-26 Some writers build worlds. Others birth entire universes. In the decades since its publication, Frank Herbert's Dune has become arguably the best-selling and certainly the best-known science fiction novel ever written. So how did an ex-Navy newspaperman from Washington State come to write such a world-conquering novel? And how was he able to pack it with so many layers of myth and meaning? Herbert's boundless imagination was sparked by a dizzying array of ideas, from classical history to cutting-edge science, from environmentalism to Zen philosophy, and from Arabic texts to Shakespeare's tragedies. Beginning on Arrakis and going planet by planet, The Worlds of Dune offers a supremely deep dive into Herbert's universe – detailing along the way the many diverse strands that he wove into his epic creation to offer a visually rich accompaniment to this sci-fi legend.

Guys and Guns Amok Douglas Kellner 2015-12-03 From the recent shootings at Virginia Tech University to the tragedies at Columbine and Oklahoma City, certain common traits can be traced through all of these events. In *Guys and Guns Amok*, media and cultural critic Douglas Kellner provides a fascinating diagnostic reading of these acts of domestic terrorism. Skillfully connecting each case with the current environment for male socialization and the search for identity in an American culture obsessed with guns and militarism, Kellner's work is a sobering reflection on these tragedies and the pervasive power of media and popular culture as well as a wake-up call for the future.

Youth Resistance Research and Theories of Change Eve Tuck 2013-11-26 Youth resistance has become a pressing global phenomenon, to which many educators and researchers have looked for inspiration and/or with chagrin. Although the topic of much discussion and debate, it remains dramatically under-theorized, particularly in terms of theories of change. Resistance has been a prominent concern of educational research for several

decades, yet understandings of youth resistance frequently lack complexity, often seize upon convenient examples to confirm entrenched ideas about social change, and overly regulate what "counts" as progress. As this comprehensive volume illustrates, understanding and researching youth resistance requires much more than a one-dimensional theory. *Youth Resistance Research and Theories of Change* provides readers with new ways to see and engage youth resistance to educational injustices. This volume features interviews with prominent theorists, including Signithia Fordham, James C. Scott, Michelle Fine, Robin D.G. Kelley, Gerald Vizenor, and Pedro Noguera, reflecting on their own work in light of contemporary uprisings, neoliberal crises, and the impact of new technologies globally. Chapters presenting new studies in youth resistance exemplify approaches which move beyond calcified theories of resistance. Essays on needed interventions to youth resistance research provide guidance for further study. As a whole, this rich volume challenges current thinking on resistance, and extends new trajectories for research, collaboration, and justice.
