universities have the daunting task of selecting a balanced student body. Added to their challenges, the economic recession of 2008-2009 negatively impacted potential applicants from lower-income families. Evidence suggests that high Standard Aptitude Test (SAT) scores are correlated with a family's socioeconomic status. Thus, the problem of selecting the "best" students from an ever-increasing pool of applicants may render standardized admissions tests a less desirable selection mechanism. The next admissions battle may be whether well-endowed universities should commit themselves to a form of class-based affirmative action in order to balance the socioeconomic advantages of well-to-do families. Such a policy would improve prospects for students who may have ambitions for an education that is beyond their reach without preferential treatment. As in past decades, admissions policies may remain a question of balances and preferences.

Chinese Student Migration and Selective Citizenship

Lisong Liu 2015-08-20 Since China began its open-door and reform policies in 1978, more than three million Chinese students have migrated to study abroad, and the United States has been their top destination. The recent surge of students following this pattern, along with the rising tide of Chinese middle- and upper-classes' emigration out of China, have aroused wide public and scholarly attention in both China and the United States.

book examines the four waves of Chinese student migration to the US since the late 1970s, showing how they were shaped by the profound changes in both nations and by US-China relations. It discusses how student migrants with high socioeconomic status transformed Chinese American communities and challenged American immigration laws and race relations. The book suggests that the rise of China has not negated the deeply rooted "American dream" that has been constantly reinvented in contemporary China. It also addresses the theme of "selective citizenship" - a way in which migrants seek to claim their autonomy - proposing that this notion captures the selective nature on both ends of the negotiations between nation-states and migrants. It cautions against a universal or idealized "dual citizenship" model, which has often been celebrated as a reflection of eroding national boundaries under globalization. This book draws on a wide variety of sources in Chinese and

English, as well as extensive fieldwork in both China and the US, and its historical perspective sheds new light on contemporary Chinese student migration and post-1965 Chinese American community. Bridging the gap between Asian and Asian American studies, the book also integrates the studies of migration, education, and international relations. Therefore, it will be of interest to students of these fields, as well as Chinese history and Asian American history more generally.

activism during the second decade of the 21st century--up to and including the Black Lives Matter movement and the extraordinary events of 2020. Student resistance in the second decade of the 21st century has increased in both quantity and quality, supercharged by social media, to the point where it has become the single most powerful force for change in the world today, embodying the hopes of hundreds of millions of citizens to finally address climate change, the condition of women and other major issues. Student resistance movements are the vanguard that can jumpstart wider social movements that put governments on notice at a time when corruption and stagnation plague democracies and authoritarian regimes alike. In Student Resistance in the Age of Chaos, Book 2, Mark Boren details the increasing technological sophistication of student movements, as the stakes continue to rise and the movements grow ever larger.

world, student activists today use technology to turn local movements into national and international ones. Armed with sophisticated communications and cell phone cameras to record police violence, linked to websites for broadcasting and encrypted apps for privacy, today's student activists have already done much to stop genocide and ensure government reform or regime change in scores of countries. Student Resistance in the Age of Chaos, Book 2, is being published simultaneously with Student Resistance in the Age of Chaos, Book 1, 1999-2009: Globalization, Human Rights, Religion, War, and the Age of the Internet. Together, the two volumes present a complete and unprecedented history of today's student activism phenomenon. As Mark Boren writes, "The explosion of protests in the world has shown us that there are millions of people--many of them young and altruistic--who are willing to stand up to forces of oppression, to risk their bodies, their freedom,

Another goal of this project is to increase practical knowledge and improve technical expertise using modern web development tools and technologies currently used in the industry. These include web frameworks such as the PHP framework Laravel and the JavaScript framework Vue.js, both of which will be researched and utilized in the construction of this project. This objective is executed by designing and implementing the student platform web-based single-page application mentioned above while learning and using the modern web development tools to gain technical skills and knowledge at the same time, both of which will be very valuable for years to come for future endeavors in the web development industry.

rogue cops who stand charged with the ultimate form of police corruption—shielding their crimes behind their badges while they worked for the mob. These crimes included murder, kidnapping, torture, and the betrayal of an entire generation of New York City detectives and federal agents. This gripping real-life detective story reveals two brotherhoods, both with hierarchies, rituals, and codes of conduct. Chased for seven years by William Oldham, the brilliant and determined detective who didn't let the case die, Detectives Caracappa and Eppolito are at the centre of an investigation that moves from the mobbed-up streets of Brooklyn to Hollywood sets and the Las Vegas strip. Co-written with prize-winning investigative journalist Guy Lawson, the story spans three decades and showcases a cast of characters that runs the gamut from capo psychopaths to grieving mothers to a group of retired detectives and investigators working to see that justice is done. Universities and Conflict Juliet Millican 2017-11-08 This book uses a series of case studies to examine the roles played by universities during situations of conflict, peacebuilding and resistance. While a body of work dealing with the role of education in conflict does exist, this is almost entirely concerned with compulsory education and schooling. This book, in contrast, highlights and promotes the importance of higher education, and universities in particular, to situations of conflict, peacebuilding and resistance. Using case studies from Europe, Africa, Asia and the Middle East, this volume considers institutional responses, academic responses and student responses, illustrating these in chapters written by those who have had direct experience of these issues. university's tripartite functions (of research, teaching and service) in relation to the different phases or stages of conflict (pre conflict, violence, post conflict and peacebuilding), it draws together some of the key contributions a university might make to situations of instability, resistance and recovery. The book is organised in five sections that deal with conceptual issues, institutional responses, academic-led or discipline-specific responses, teaching or curriculum-led responses and student involvement. Aimed at those working in universities or concerned with conflict recovery and peacebuilding it highlights ways in which universities can be a valuable, if currently neglected, resource. This book will be of much interest to students of peace studies, conflict resolution, education studies and IR in general.

An international team of leading researchers based across five continents provides a global overview of Anglicanism alongside twelve detailed case studies. The case studies stretch from Singapore to England, Nigeria to the USA and mostly focus on non-western Anglicanism. This book is a critical resource for students and scholars seeking an understanding of the past, present and future of the Anglican Church. More broadly, the study offers insight into debates surrounding secularisation in the contemporary world.

education---the relentless achievement gap between low-socioeconomic students of color and their economically advantaged White counterparts. Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap, focusing on Black and Latino/Latina students. He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory, an asset-based perspective and a systemic inequality approach. By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools, Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps. Following each of these concerns, Valencia provides a number of reform suggestions that can lead to systemic transformations of K-12

This acclaimed book—called a “masterpiece” by the esteemed scholar Robert W. International Students in the Asia Pacific Peter Kell

2012-02-29 This book documents the growing mobility of international students in the Asia Pacific. International students comprise over 2.7m students and it is estimated by the OECD that this will top 8 million in 2020. The great majority of them are students from the Asian countries who study in the Europe, North America and Asia. In addition countries such as Singapore, Malaysia and Hong Kong are becoming “education hubs” and are proposing to attract international students. Over 42% of international students come from Asia and this is predicted to continue with the strong presence of students from China, India, Korea and Japan continuing. A younger population, a growing middle class and shortages of quality education providers in the Asia Pacific region means that this mobility will be a feature of the

future. This book explores questions around the mobility of international students in the context of the global economy and an increasingly competitive trans-national education market. It also explores questions about the experience of international students principally from the Asia Pacific region at a time of increased global insecurity and growing hostile reactions to foreigners in the post September 11th era. This book emerges from empirical work from several research projects funded by the World Bank and several community projects to support international students. The focus is also on the way in which student mobility promotes growing connection within the Asia Pacific, as well as other regions, and provides the foundations for new notions of global citizenships.

Town, USA is thus a timely ethnography with an innovative structure: the authors helped organize fifteen residents formerly involved with the streets and/or the criminal justice system to document the relationship between structural opportunity and experiences with violence in Wilmington's Eastside and Southbridge neighborhoods. Earlier scholars offered rich cultural analysis of violence in low-income Black communities, and yet this literature has mostly conceptualized violence through frameworks of personal responsibility or individual accountability. And even if acknowledging the pressure of structural inequality, most earlier researchers describe violence as the ultimate result of some moral failing, a propensity for crime, and the notion of helplessness. Instead, in Murder Town USA, Payne, Hitchens, and Chamber, along with their collaborative team of street ethnographers, instead offer a radical re-conceptualization

annually by Al-Zaytouna Centre. The Report is rich with information, analyses, tables and charts besides strategic visions and future outlooks. It is published for the sixth year in a row and it has become one of the major sources for experts and those interested in the Palestinian issue. It provides a comprehensive coverage of the developments of the Palestinian issue that happened over a year while abiding by strict scientific and professional standards. The Report is 444 medium-sized pages. It is co-authored by 15 researchers specialized in the Palestinian issue, reviewed by four consultants and edited by Dr. Mohsen M. Saleh. The PSR 2010/11 stresses that the uprisings witnessed in the Arab world since early 2011, especially in Egypt, will have a direct impact on the Palestinian issue. The impact will most likely be positive if the uprisings achieved their goals and yielded political regimes which express the real will of the Arab peoples.

the internal affairs would most probably be the primary concern during the coming period. Regarding the inter-Palestinian reconciliation, PSR 2010/11 asserts that the reconciliation agreement signed in Cairo last May still needs more serious steps to end the division and achieve real reconciliation on the ground. It needs to resolve many obstacles through cooperation between the different parties, away from external interventions and pressures. On the Israeli level, the Report mentions that 2010 has continuously witnessed the inclination of the Israeli society towards the extreme right. It further notes the absence of any breakthroughs in 2011 especially in the light of Israel's rejection for the negotiations with President Mahmud 'Abbas. The agreement signed with Hamas and the PA's attempts to obtain international recognition of the Palestinian State in September 2011 hindered such negotiations. On the international level, the PSR

says that the international diplomatic efforts towards the Palestinian issue have failed again in 2010. They could not achieve any significant progress regarding the peace settlement track or the siege imposed on the Gaza Strip. Moreover, PSR 2010/11 includes a large number of figures and statistics on Israeli violations on different levels. During 2010, 98 Palestinians were killed in the West Bank and Gaza Strip (including Jerusalem) by Israeli forces and settlers while 967 Palestinians and international solidarity activists were wounded. On the other hand, Israel's internal security service mentioned that during 2010, 9 Israelis were killed and 28 were wounded in operations carried out by the Palestinians. Concerning settlement building, the Report shows that despite the 10-month Israeli moratorium on settlement building, Israel established 1819 buildings/apartments in 133 settlements all over the West Bank, including Jerusalem; in addition to 1433

(caravans). PSR 2010/11 also discusses the increased Israeli attacks on the Islamic and Christian holy sites in Jerusalem and historic Palestine, during 2010. It further shows that the developments during that year revealed that the Judaization of Jerusalem has become the primary battle for Israel due to the obsession with the “Jewishness of the state” dominating the Israeli mind. Concerning demographic indicators, PSR 2010/11 mentions that at the end of 2010 the number of Palestinians around the world was around 11.14 million people. More than half of them, i.e., 5.75 million (51.6%) live in Diaspora, while the rest, i.e., 5.39 million (48.4%) live in historic Palestine. The latter are distributed by 1.28 million people in the territories occupied in 1948 and 4.11 million in the '67 territories. The Report mentions that if the current growth rates of the Palestinians and the Jews persist, the number of Palestinians and Jews will

become on par by 2017 where each will reach around 6.53 million. Thus, in 2020, around 49.2% of the population will be Jews as their number will reach 6.87 million compared to 7.09 million Palestinians. Regarding the economic indicators in the West Bank and the Gaza Strip, the Report shows that events during 2010 has not affected the direct dependence of the Palestinian economy on the Israeli economy. In addition, the isolation of the Palestinian economy from the outside world continued due to the Israeli control of all international exits and Palestinian border crossings besides the Palestinian foreign trade. PSR 2010/11 also refers to the enormous difference between the Palestinian economy in the West Bank and the Gaza Strip on one hand and the Israeli economy on the other. Thus, it shows, for example, that in 2010 the Palestinian GDP per capita was \$1500 (around \$1925 in the West Bank and \$877 in the Strip) compared to \$28,500 in Israel. In addition,

amounted to \$5.73 billion for the Palestinians compared to \$217.13 billion for the Israelis.

When the News Broke

Heather Hendershot

2023-01-16 A riveting, blow-by-blow account of how the network broadcasts of the 1968 Democratic convention shattered faith in American media. “The whole world is watching!” cried protestors at the 1968 Democratic convention as Chicago police beat them in the streets. When some of that violence was then aired on network television, another kind of hell broke loose. Some viewers were stunned and outraged; others thought the protestors deserved what they got. No one—least of all Chicago mayor Richard J. Daley—was happy with how the networks handled it. In *When the News Broke*, Heather Hendershot revisits TV coverage of those four chaotic days in 1968—not only the violence in the streets but also the tumultuous convention itself, where Black citizens and others forcefully challenged southern delegations that had

excluded them, anti-Vietnam delegates sought to change the party’s policy on the war, and journalists and delegates alike were bullied by both Daley’s security forces and party leaders. Ultimately, Hendershot reveals the convention as a pivotal moment in American political history, when a distorted notion of “liberal media bias” became mainstreamed and nationalized. At the same time, she celebrates the values of the network news professionals who strived for fairness and accuracy. Despite their efforts, however, Chicago proved to be a turning point in the public’s trust in national news sources. Since those critical days, the political Right in the United States has amplified distrust of TV news, to the point where even the truest and most clearly documented stories can be deemed “fake.” As Hendershot demonstrates, it doesn’t matter whether the “whole world is watching” if people don’t believe what they see.

American Labyrinth

Raymond Haberski, Jr. 2018-12-15 Intellectual history has never been more relevant and more important to public life in the United States. In complicated and confounding times, people look for the principles that drive action and the foundations that support national ideals. American Labyrinth demonstrates the power of intellectual history to illuminate our public life and examine our ideological assumptions. This volume of essays brings together 19 influential intellectual historians to contribute original thoughts on topics of widespread interest. Raymond Haberski Jr. and Andrew Hartman asked a group of nimble, sharp scholars to respond to a simple question: How might the resources of intellectual history help

light on contemporary issues with historical resonance? The answers—all rigorous, original, and challenging—are as eclectic in approach and temperament as the authors are different in their interests and methods. Taken together, the essays of American Labyrinth illustrate how intellectual historians, operating in many different registers at once and ranging from the theoretical to the political, can provide telling insights for understanding a public sphere fraught with conflict. In order to understand why people are ready to fight over cultural symbols and political positions we must have insight into how ideas organize, enliven, and define our lives. Ultimately, as Haberski and Hartman show in this volume, the best route through our contemporary American labyrinth is the path that traces our practical and lived ideas.

Splintered Jonathan Butcher
2022-03-22 The problem with our nation's schools today is not just the low test scores in basic reading and math—which are an obstacle for the economy, not to mention students' futures. The challenge is that K-12 instruction has been hijacked by Critical Theorists who are "skeptical" of representative government and the freedoms we cherish. The debates over the retelling of America's past, on display in local school board meetings as well as conflicts between the New York Times' 1619 Project and President Donald Trump's 1776 Commission, involve not just historical facts, but how Americans define their nation. This battle over our national identity is a cultural battle, involving schools—cultural institutions—and the ideas we all need to share to get along with our neighbors.

families, and pursue the American Dream. “Jonathan Butcher is one of our sharpest and most insightful analysts writing about education today. The nation owes him a debt of gratitude for work demystifying an obscure academic field, critical race theory, and fearlessly following where it leads when imposed on our public schools: abandoning the cherished belief that education can be a means of uniting our diverse country and replacing it with a pedagogy of grievance and despair.” —Robert Pondiscio, Senior Fellow, American Enterprise Institute and author of *How the Other*

Half Learns “Jonathan Butcher’s timely book on critical race theory addresses what I have described as the civil rights issue of our times. Too few Americans understand how this dangerous ideology and how it has seeped down into our K-12 educational system. Butcher’s book is part of a collective effort to educate the American people about the infiltration and indoctrination of our educational system.”
