News for All the People 2012-09-11 Joseph Torres From colonial newspapers to the Internet age, America’s racial divisions have played a central role in the creation of the country’s media system, just as the media has contributed to—and every so often, combated—racial oppression. This acclaimed book-called a "masterpiece" by the esteemed scholar Robert W. McChesney and chosen as one of 2011’s best books by the Progressive—reveals how racial segregation distorted the information Americans have received, even as it depicts the struggle of Black, Latino, Asian, and Native American journalists who fought to create a vibrant yet little-known alternative, democratic press. Written in an exciting, story-driven style and replete with memorable portraits of journalists, both famous and obscure, News for All the People is destined to become the standard history of the American media.

News for All the People 2011-12-23 Juan Gonzalez Here is a new, sweeping narrative history of American news media that puts race at the center of the story. From the earliest colonial newspapers to the Internet age, America’s racial divisions have played a central role in the creation of the country’s media system, just as the media has contributed to—and every so often, combats—racial oppression. News for All the People reveals how racial segregation distorted the information Americans received from the mainstream media. It unearths numerous examples of how publishers and broadcasters actually fomented racial violence and discrimination through their coverage. And it chronicles the vibrant federal media policies exerted in such conflicts. It depicts the struggle of Black, Latino, Asian, and Native American journalists who fought to create a vibrant yet little-known alternative, democratic press, and then, beginning in the 1970s, forced open the doors of the major media companies. The writing is fast-paced, story-driven, and replete with memorable portraits of individual journalists and media executives, both famous and obscure, heroes and villains. It weaves back and forth between the corporate and government leaders who built our segregated media system—such as Herbert Hoover, whose Federal Radio Commission eagerly awarded a license to a notorious Ku Klux Klan organization in the nation’s capital—and those who rebelled against that system, like Pittsburgh Courier publisher Robert L. Vann, who led a remarkable national campaign to get the black-face comedy Amos ‘n’ Andy off the air. Based on years of original archival research and up-to-the-minute reporting and written by two veteran journalists and leading advocates for a more inclusive and democratic media system, News for All the People should become the standard history of American media.

Use and Reuse of the Digital Archive 2021-08-31 John Potts This book examines the use and re-use of digital archives in a unique manner, by combining theoretical and practical approaches to the contemporary digital archive. The book brings together a range of writers - specialising in media and cultural studies, contemporary art and art history, digital and networked culture, library and museum studies - to explore the cultural impact of digital archives. Several of the essays describe the process of constructing a digital archive as a specific case study – in digitising a physical archive and designing a searchable digital database as the core of the digital archive. Other chapters explore the cultural significance of digital archives in more general theoretical terms. These considerations include: the specific properties of the digital archive; its similarities and differences to the traditional paper-based archive; the ethical decisions made in the design of an archive; and the potential for creative re-use of online archived materials.

Splintered 2022-03-22 Jonathan Butcher The problem with our nation’s schools today is not just the low test scores in basic reading and math—which are an obstacle for the economy, not to mention students’ futures. The challenge is that K-12 instruction has been hijacked by Critical Theorists who are “skeptical” of representative government and the freedoms we cherish. The debates over the retelling of America’s past, on display in local school board meetings as well as conflicts between the New York Times’ 1619 Project and President Donald Trump’s 1776 Commission, involve not just historical facts, but how Americans define their nation. This battle over our national identity is a cultural battle, involving schools—cultural institutions—and the ideas we all need to share to get along with our neighbors, raise families, and pursue the American Dream. “Jonathan Butcher is one of our sharpest and most insightful analysts writing about education today. The nation owes him a debt of gratitude for work demystifying an obscure academic field, critical race theory, and fearlessly following where it leads when imposed on our public schools: abandoning the cherished belief that education can be a means of uniting our diverse country and replacing it with a pedagogy of grievance and despair.” —Robert Pondiscio, Senior Fellow, American Enterprise Institute and author of How the Other Half Learns “Jonathan Butcher’s timely book on critical race theory addresses what I have described as the civil rights issue of our times. Too few Americans understand how this dangerous ideology and how it has seeped down into our K-12 educational system. Butcher’s book is part of a collective effort to educate the American people about the infiltration and indoctrination of our educational system.” —Dr. Carol M. Swain, a former tenured professor at Vanderbilt and Princeton Universities

The African World in Dialogue 2016-11-29 Teresa N. Washington The African World in Dialogue: An Appeal to Action! is a probing and politically timely collection of essays, interviews, speeches, poetry, short stories, and proposals. These rich works illuminate the struggles, dreams, triumphs, impediments, and diversity of the contemporary African world. The African World in Dialogue contains five sections: "Listen: The Ink Speaks"; "Restitutions, Resolutions, Revolutions"; "Africanity, Education, and Technology"; "Life Lines from the Front Lines"; and "Gender, Power, and Infinite Promise." Each section brims with provocative and compelling insights from elder-warriors, wordsmiths, journalists, and academics, many of whom are also activists. The volume's contributors include Tunde Adegbola, Muhammad Ibn Bashir, Jacqueline Bediako, Charlie Braxton, Aliou Bundu, Baba A. O. Buntu, Chinweizu, Ricardo Cortez Cruz, Oyinlola Longe, Jumbe Kweku Lumumba, Morgan Miller, Asiri Odu, Chinwe Ezinna Orijì, Kevin Powell, Blair Marcus Proctor, Ishola Akindele Salami, Aseret Sin, Teresa N. Washington, and Ayoka Wiles. The book also features interviews with Hilary La Force, Mandingo, Kambale Musavili, and Prince Kuma N'dumbe. With selections designed to critique and in many cases upend conventional political thought, educational norms, fantasies of social progress, and gender myths, The African World in Dialogue challenges its audience. The book’s “Appeal to Action” is literal: Rather than offering eloquent elaborations of African world woes, The African World in Dialogue offers detailed plans and paths for emancipation and elevation that readers are urged to implement. Activists and scholars of African studies, African American studies, Pan-Africanism, criminal justice, Black revolutionary thought and action, gender studies, sociology, and political science will find this book to be both inspirational and indispensable.

International Students in the Asia Pacific 2012-02-29 Peter Kell This book documents the growing mobility of international students in the Asia Pacific. International students comprise over 2.7m students and it is estimated by the OECD that this will top 8 million in 2020. The great majority of them are students from the Asian countries who study in the Europe, North America and Asia. In addition countries such as Singapore, Malaysia and Hong Kong are becoming "education hubs" and are proposing to attract international students. Over 42% of international students come from Asia and this is predicted to continue with the strong presence of students from China, India, Korea and Japan continuing. A younger population, a growing middle class and shortages of quality education providers in the Asia Pacific region means that this mobility will be a feature of the future. This book explores questions around the mobility of international students in the context of the global economy and an increasingly competitive trans-national education market. It also explores questions about the experience of international students principally from the Asia Pacific region at a time of increased global insecurity and growing hostile reactions to foreigners in the post September 11th era. This book emerges from empirical work from several research projects funded by the World Bank and several community projects to support international students. The focus is also on the way in which student mobility promotes growing connection within the Asia Pacific, as well as other regions, and provides the foundations for new notions of global citizenships.

News Media and the Neoliberal Privatization of Education 2016-03-01 Zane C. Wubbena This edited volume contributes to a burgeoning field of critical scholarship on the news media and education. This scholarship is based on an understanding that the news media has increasingly applied a neoliberal template that mediates knowledge and action about education. This book calls into question what the public knows about education, how the public is informed, and whose interests are represented and ultimately served through the production and distribution of information by the news media about education. The chapters comprising this volume serve to enlighten and call to action parents, students, educators, academics and scholars, activists, and policymakers for social, political, and economic transformation. Moreover, as the neoliberal agenda in North America intensifies, the chapters in this book help to deepen our understanding of the logics and processes of the neoliberal privatization of education and the accompanying social discourses that facilitate the reduction of social relations to a transaction in the marketplace. The chapters examine the news media and the reproduction of neoliberal educational reforms (A Nation at Risk, Teach For America, charter schools, think tanks, and PISA) and resistance to neoliberal educational reforms (online activism and radical Black press) while also broadening our conceptual understanding of the marketization and mediation of educational discourses. Overall, the book provides an in-depth understanding of the neoliberal privatization of education by extending critical examinations to this underrepresented field of cultural production: the news media coverage of education. The contribution of this edited volume, therefore, helps to build an understanding of the contemporary dynamics of capital accumulation to inform public resistance for social transformation.

Excellence for All 2010 Jack Schneider Excellence For All: American Education Reform, 1983-2008 examines the history of school reform in the United States over the past quarter-century. Specifically, the work examines an approach to educational change best characterized by the phrase "excellence for all"—an equity-focused policy phenomenon uniquely situated for the policymaking context of the late twentieth and early twenty-first centuries. The idea of promoting excellence for all students united a broad enough coalition to pursue a truly national reform effort and captured the imaginations of leaders in state and local government, at philanthropic foundations, in colleges and universities, and in school districts across the country. Led by a corps of self-styled educational entrepreneurs aggressively pursuing reforms that they could take "to scale," the movement sought to remake the American high school piece by piece. The dissertation examines this reform movement through the nation’s three largest districts—New York, Chicago, and Los Angeles—and through three particular change efforts: a physical plant reform (the small schools movement), a personnel reform (Teach For America), and a curricular reform (the Advanced Placement Program). The work aims to establish the ways in which this most recent era of school reform represented a departure from previous reform eras, strives to explain the movement’s broad appeal, and ultimately, aims to understand its shortcomings by exploring the assumptions underlying the excellence for all approach and the tradeoffs required by it.

Creating Supportive Spaces for Pregnant and Parenting College Students 2023-12-01 Catherine L. Riley This volume brings together interdisciplinary research, theoretical perspectives, and detailed explanations of paths and examples to help colleges become supportive spaces for pregnant and parenting students. Expanding the discourse around pregnant and parenting college students to a more interdisciplinary and international arena, this volume follows the ground-breaking disquisition, formerly set forth by ‘Title IX and the Protection of Pregnant and Parenting College Students (Riley, Hutchinson, Dix 2022)’, to define this cohesive field and bring together separate voices to help colleges become more supportive spaces after the . The chapters explore academia’s attitude toward motherhood, families, and care work, the invisibility of pregnant and parenting students, system-wide negligence, the forgotten nature of student-fathers, unacknowledged miscarriages, organized policy change efforts, involved agencies of change, the troubling presence of coercion, and more. While arguing that barriers currently prevent colleges from becoming supportive spaces, the volume asserts that improvements are both feasible and vital for ensuring that institutions of higher education are complying with Title IX, a U.S. federal law. Offering interdisciplinary research, explanations of problems, and paths for progress, this edited volume will be useful to scholars, researchers, administrators, and activists working to support pregnant and parenting students. Various chapters will also interest those working in higher education administration, education policy, reproductive health, gender studies, and health and organizational communication more broadly. Supporting pregnant and parenting college students, however, is a shared responsibility belonging to all members of a campus community; accordingly, this volume is for every institution that plans to comply with Title IX.

The Brotherhood 2013-07-15 Erick Stakelbeck The Brotherhoods is the chilling chronicle of the alleged crimes and betrayals of NYPD Detectives Stephen Caracappa and Louis Eppolito, notorious rogue cops who stand charged with the ultimate form of police corruption—shielding their crimes behind their badges while they worked for the mob. These crimes included murder, kidnapping, torture, and the betrayal of an entire generation of New York City detectives and federal agents. This gripping real-life detective story reveals two brotherhoods, both with hierarchies, rituals, and codes of conduct. Chased for seven years by William Oldham, the brilliant and determined detective who didn't let the case die, Detectives Caracappa and Eppolito are at the centre of an investigation that moves from the mobbed-up streets of Brooklyn to Hollywood sets and the Las Vegas strip. Co-written with prize-winning investigative journalist Guy Lawson, the story spans three decades and showcases a cast of characters that runs the gamut from capo psychopaths to grieving mothers to a group of retired detectives and investigators working to see that justice is done.This quintessential American mob tale, both bizarre and compelling, ranks with such modern crime classics as Serpico, Donnie Brasco, and Wiseguy.

The State of Copyright 2014-02-05 Debora Halbert This book seeks to make an intervention into the ongoing debate about the scope and intensity of global copyright laws. While mapping out the primary actors in the context of globalization and the modern political economy of information ownership, the argument is made that alternatives to further expansion of copyright are necessary. By examining the multiple and competing interests in creating the legal regime of copyright law, this books attempts to map the political economy of copyright in the information age, critique the concentration of ownership that is intrinsic in the status quo, and provide an assessment of the state of the contemporary global copyright landscape and its futures. It draws upon the current narratives of copyright as produced by corporate, government, and political actors and frames these narratives as language games within a global political project to define how information and culture will be shared and exchanged in the future. The text problematizes the relationship of the state to culture, comments on the global flows of culture, and critiques the regulatory apparatus that is in place to commodify culture and align it with the contemporary nation-state. In the end, the possibility of non-commodified and more open futures are explored. The State of Copyright will be of particular interest for students and scholars of international political economy, law, political science, anthropology, sociology, cultural studies, library sciences, and communication studies. It also will appeal to a growing popular audience that has taken an interest in the issues of copyright.

The Death of "Why?" 2009-07-13 Andrea Batista Schlesinger Obsessed with answers, we have lost sight of the power and value of questions. Debates over globalization, climate change, health care, and poverty will not be “solved” with simple answers, but that’s what Americans are being trained to expect. Andrea Batista Schlesinger argues that we’re besieged by cultural forces that urge us to avoid critical thinking and independent analysis. The media reduces politics to a spectator sport, standardized tests teach students to fill in the dots instead of opening their minds, and even the Internet promotes habits that discourage looking deeper. But the situation isn’t hopeless. Schlesinger profiles individuals and institutions renewing the practice of inquiry—particularly in America’s youth—at a time when our society demands such activity from us all. Our resilience will depend on our ability to struggle with what we don’t know, to live and think outside comfortable bubbles of sameness, and, ultimately, to ask questions.

It involves present and future economic factors, making it critical to obtain reliable estimates of future costs, benefits, and other economic parameters. Engineers often deal with projects whose scale, complexity, and uncertainty call for advanced approaches to planning and budgeting^[2]^[1]. Several methods are used for cost estimation, including rough

estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates^{[1][2]}. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. Several models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate generally increases as the resources allocated to developing the estimate increase.

Chapter 4 of Holt Chemistry, titled “The Periodic Table”, provides a thorough overview of the periodic table and its elements. The chapter starts with a discussion on the characteristics of groupings and periods, elucidating how the Russian chemist Dmitri Mendeleev arranged elements by their weight in increasing order1. It then delves into the notion of outer electrons and energy levels of atoms, underscoring the role of valence electrons in chemical reactions and alterations to atomic structures and molecules.

The chapter moreover differentiates between transition metals and main elements, detailing on their characteristics and characteristics. It also clarifies the notion of energy of ionization and its patterns among groupings and periodic groups on the table of elements1. The chapter discusses atomic and radii, and how these can be anticipated based on an element’s place on the periodic table.

Electronegativity, which calculates an atom’s inclination to draw a bonding pair of electrons, is another important theme addressed in this part1. The chapter finishes with a conversation on the relationship diagonally, metallic character, and boiling point of constituents.

In terms of practice questions, the chapter provides a variety of practice questions and standardized test preparation resources to bolster the notions understood. These exercises cover a range of themes, from understanding the organization of elements to exploring the patterns in the periodic table.
