The One Year Book of Amazing Stories Robert Petterson 2018-10-09 ECPA 2020 Christian Book Award Finalist! You wouldn't believe it, but . . . James Earl Jones, the voice of Darth Vader, grew up mute. Michael Jordan was cut from his high school basketball team. Albert Einstein was bullied mercilessly in school. Beethoven's mom almost aborted him. Life takes the strangest sharp turns—and sometimes, U-turns. Robert Petterson—popular speaker, storyteller, and author—has been a student for his entire life of what God is teaching us through those real-life U-turns. In this book, he compiles 365 amazing stories that teach lessons you won't easily forget. Each entry is written in the rest-of-the-story style popularized by Paul Harvey. With *The One Year Book of Amazing Stories*, you'll marvel at how God has used the lives of these ordinary people to change the course of human history.

The Internet in China Zixue Tai 2007-05-07 *The Internet in China* examines the cultural and political ramifications of the Internet for Chinese society. The rapid growth of the Internet has been enthusiastically embraced by the Chinese government, but the government has also rushed to seize control of the virtual environment. Individuals have responded with impassioned campaigns against official control of information. The emergence of a civil society via cyberspace has had profound effects upon China—for example, in 2003, based on an Internet campaign, the Chinese Supreme People's Court overturned the ruling of a local court for the first time since the Communist Party came to power in 1949. The important question this book asks is not whether the Internet will democratize China, but rather in what ways the Internet is democratizing communication in China. How is the Internet empowering individuals by fostering new types of social spaces and redefining existing social relations?

Privilege and Diversity in the Academy Frances A. Maher 2013-10-18 Over the past several decades, higher education has been transformed by the entry of faculty of color and women into the university system. Through detailed institutional ethnographies of three very different universities, *Privilege and Diversity in the Academy* explores how this diversification has dismantled and reconfigured relationships of privilege and diversity in higher education. Authors Maher and Tetreault use examples from a top-ranked private university, a comprehensive urban university, and a major public university to illustrate how privilege is enacted, resisted, and transformed as changes occur in the student bodies and faculties of these schools. In their analyses, they identify the institutional structures that facilitate the success of a diverse faculty and make valuable observations about patterns of institutional change and resistance.

Cambodia and the Politics of Aesthetics Alvin Cheng-Hin Lim 2013 Illuminating developments in contemporary Cambodia with political and aesthetic theory, this book analyses the country's violent transition from socialism to capitalism through an innovative method that combines the aesthetic approach and critical theory. To understand the particularities of the country's transition and Cambodia's unfolding encounter with neoliberal capitalism, the book pursues the circuits of desire connecting the constellation of objects and relations, which is identified as Cambodia. Chapters focus on the pre-colonial empire of Angkor, the invasions of Siam and Vietnam in the nineteenth century, the devastation of the Khmer Rouge genocide and the subsequent Vietnamese occupation, and the present rapacity of Hun Sen's neoliberal government. A creative combination of auto-ethnography, critical theory, and area studies and the analysis of a historical moment, the book is of interest to academics working on comparative politics, Asian studies, holocaust studies, critical theory, and in the politics of aesthetics.

Administration of Intercollegiate Athletics Erienne Weight 2015-01-05 *Administration of Intercollegiate Athletics* brings together some of the most knowledgeable professionals in the field of athletics administration to create an essential resource for all who aspire to work in this exciting field. This wide-ranging compilation of vital material on the subject of athletics administration is the most comprehensive

textbook available to instructors of upper-level courses in sport management and a valuable resource for those in Division I, Division II, Division III, junior college, and National Association of Intercollegiate Athletics levels. This textbook takes a unique approach in the domain of sport education. Contributors to the text, chosen for their widely acknowledged expertise in collegiate athletics administration, provide students with access to ideas from top researchers in the field to incorporate into their evolving professional philosophy. The text offers practical considerations and applications for financial operations, budgeting, marketing, corporate sponsorship, safety and risk assessment, ticketing, licensing, and alumni relations. These topics, in addition to those on media relations, facility and event management, and athlete services are unparalleled to any other text in the industry. There is detailed information on expectations in academics and status of standards for athletic eligibility and discussions of the importance of publicity and promotion, public relations, and media production in today's college athletics. Learning tools in *Administration of Intercollegiate Athletics* enrich students' understanding: • Leadership Lessons provide key points, inspiring a leadership mind-set that is critical to success in today's world of college athletics administration. • Opening scenarios and chapter objectives create a framework for learning, highlighting critical points and translating material to a real-world setting. • Sidebars and case studies call out important concepts from readings. • Industry Profile Q&As offer students a chance to see how working administrators reached their present roles. • Learning activities for each chapter present real-life situations and direct students in applying what they have learned. • Instructor ancillary materials include a test package for evaluating students' comprehension and an image bank of content for lecture slides. With content developed in partnership with working practitioners, the information presented in *Administration of Intercollegiate Athletics* is foundational knowledge essential to professional administrators. After reading this text, students will understand each unit in an athletics department and be able to hit the ground running in any one of these units while understanding the broader organizational context.

Social Media and the Law Daxton R. Stewart 2022-10-03 This fully updated third edition of *Social Media and the Law* offers an essential guide to navigating the complex legal terrain of social media. Social media platforms like Facebook, Twitter, Instagram, YouTube, and TikTok have become vital tools for professionals in the news and strategic communication fields. As these services have rapidly grown in popularity, their legal ramifications have continued to develop, resulting in students and professional communicators needing to be aware of laws relating to defamation, privacy, intellectual property, and government regulation. Editor Daxton Stewart brings together eleven media law scholars to address key questions, such as the following: To what extent do communicators put themselves at risk for lawsuits when they use these tools? What rights do communicators have when other users talk about them on social networks? How can people and companies manage intellectual property issues consistent with the developing law in this area? This book is essential for students of media, mass communication, strategic communication, journalism, advertising, and public relations, as well as professional communicators that use social media in their role.

New Directions in Psychiatry Maurizio Pompili 2020-06-08 This book focuses on hot issues faced by clinicians in everyday clinical practice, and provides in-depth analyses of both met and unmet needs in the management of psychiatric disorders. It has been repeatedly shown that the needs of patients, relatives, the community at large and those of the governmental bodies only partially overlap. For instance, patients in their families are more concerned about quality of life, treatment, autonomy, and independent living; whereas governmental stakeholders are typically more concerned about relapse prevention and reduction of hospitalizations. As such, a volume bridging the gap between theoretical notions and practical understanding of patients' untreated aspects of their psychiatric disorders is much needed. Instead of focusing on

traditional descriptions of psychopathology and diagnostic criteria, the volume guides readers to core problems for each topic, taking into account new approaches in the classification of mental disorders as proposed by DSM-5. It elaborates on much-debated controversial problems such as the assessment and treatment of psychomotor agitation, and non-adherence to treatment that impacts on the psychiatric context. With its unique approach, this volume appeals to anyone with an interest in the field, including researchers, clinicians, and trainees.

To Save America Newt Gingrich 2010-04-27 The message of this extraordinary election [in November 2010] is clear enough: the American citizenry has rejected the secular dogma, socialist policies, and machine-driven politics that comprise the Obama agenda. Now, the question is whether President Obama and his Democratic Party will accept the will of the people and change the destructive course upon which they have set this country. . . . [F]irst and foremost, Republicans must fight to dislodge the secular-socialist machine whose methods and goals are described in this book. This machine has driven America so deeply into debt, and has so fundamentally changed the relationship between the American citizenry and our government, that our children's future is now imperiled. We cannot assume that after the 2010 election, the machine will simply accept the will of the people. After all, the very purpose of a political machine is to thwart the will of the people. - From the introduction

Creationism's Trojan Horse Barbara Forrest 2004-01-08 Forrest and Gross expose the scientific failure, the religious essence, and the political ambitions of "intelligent design" creationism. They examine the movement's "Wedge Strategy," which has advanced and is succeeding through public relations rather than through scientific research. Analyzing the content and character of "intelligent design theory," they highlight its threat to public education and to the separation of church and state.

Sociology in Our Times Diana Kendall 2012-01-01 This best-selling comprehensive book conveys the relevance of sociology by including a timely collection of theories, research, and examples--including its signature first-person accounts that open chapters. Experiences represented in these opening vignettes accurately mirror the richness and complexity of society, while also establishing the themes that are carried throughout the chapters. Author Diana Kendall's vivid, inviting writing style, emphasis on applications, eye for the most compelling current examples, and use of assignable photo essays and companion videos engage readers and further highlight sociology's relevance to all students. Now in its Ninth Edition, *SOCIOLOGY IN OUR TIMES* is acclaimed in the field for being the first textbook to integrate race, class, and gender issues, and for its thorough presentation of sociological theory, including contemporary perspectives such as feminism and postmodernism. Unlearning Liberty Greg Lukianoff 2014-03-11 For over a generation, shocking cases of censorship at America's colleges and universities have taught students the wrong lessons about living in a free society. Drawing on a decade of experience battling for freedom of speech on campus, First Amendment lawyer Greg Lukianoff reveals how higher education fails to teach students to become critical thinkers: by stifling open debate, our campuses are supercharging ideological divisions, promoting groupthink, and encouraging an unscholarly certainty about complex issues. Lukianoff walks readers through the life of a modern-day college student, from orientation to the end of freshman year. Through this lens, he describes startling violations of free speech rights: a student in Indiana punished for publicly reading a book, a student in Georgia expelled for a pro-environment collage he posted on Facebook, students at Yale banned from putting an F. Scott Fitzgerald quote on a T shirt, and students across the country corralled into tiny "free speech zones" when they wanted to express their views. But Lukianoff goes further, demonstrating how this culture of censorship is bleeding into the larger society. As he explores public controversies involving Juan Williams, Rush Limbaugh, Bill Maher, Richard Dawkins, Larry Summers—even Dave Barry and Jon Stewart—Lukianoff paints a stark picture of our ability as a nation to discuss important issues rationally. *Unlearning Liberty: Campus Censorship and the End of American Debate* illuminates how intolerance for dissent and debate on today's campus threatens the freedom of every citizen and makes us all just a little bit dumber.

The Arts and Emergent Bilingual Youth Sharon Verner Chappell 2013-04-17 *The Arts and Emergent Bilingual*

Youth offers a critical sociopolitical perspective on working with emerging bilingual youth at the intersection of the arts and language learning. Utilizing research from both arts and language education to explore the ways they work in tandem to contribute to emergent bilingual students' language and academic development, the book analyzes model arts projects to raise questions about "best practices" for and with marginalized bilingual young people, in terms of relevance to their languages, cultures, and communities as they envision better worlds. A central assumption is that the arts can be especially valuable for contributing to English learning by enabling learners to experience ideas, patterns, and relationship (form) in ways that lead to new knowledge (content). Each chapter features vignettes showcasing current projects with ELL populations both in and out of school and visual art pieces and poems, to prompt reflection on key issues and relevant concepts and theories in the arts and language learning. Taking a stance about language and culture in English learners' lives, this book shows the intimate connections among art, narrative, and resistance for addressing topics of social injustice.

Revolutionizing the Interaction between State and Citizens through Digital Communications

Edwards III, Sam B. 2014-07-31 Networked communication technologies have drastically changed the relationship between States and their citizens. This fundamental shift has eased civilians' ability to access information and organize groups like never before, creating the need to re-examine existing theories. *Revolutionizing the Interaction between State and Citizens through Digital Communications* evaluates the relationship between governments and their constituents, and how this relationship is impacted by emerging technologies. Discussing both developed and underdeveloped nations, this book provides a comparison for the ongoing shift in societies, serving as a critical reference for legal professionals, activists, government employees, academics, and students.

News Media and the Neoliberal Privatization of Education Zane C. Wubbena 2016-03-01 This edited volume contributes to a burgeoning field of critical scholarship on the news media and education. This scholarship is based on an understanding that the news media has increasingly applied a neoliberal template that mediates knowledge and action about education. This book calls into question what the public knows about education, how the public is informed, and whose interests are represented and ultimately served through the production and distribution of information by the news media about education. The chapters comprising this volume serve to enlighten and call to action parents, students, educators, academics and scholars, activists, and policymakers for social, political, and economic transformation. Moreover, as the neoliberal agenda in North America intensifies, the chapters in this book help to deepen our understanding of the logics and processes of the neoliberal privatization of education and the accompanying social discourses that facilitate the reduction of social relations to a transaction in the marketplace. The chapters examine the news media and the reproduction of neoliberal educational reforms (A Nation at Risk, Teach For America, charter schools, think tanks, and PISA) and resistance to neoliberal educational reforms (online activism and radical Black press) while also broadening our conceptual understanding of the marketization and mediatization of educational discourses. Overall, the book provides an in-depth understanding of the neoliberal privatization of education by extending critical examinations to this underrepresented field of cultural production: the news media coverage of education. The contribution of this edited volume, therefore, helps to build an understanding of the contemporary dynamics of capital accumulation to inform public resistance for social transformation.

Stonewall's Legacy Susan B. Marine 2011-10-18 Contemporary American colleges are increasingly queer places, where significant steps toward inclusion of BGLT students have been made. Tracing the journey of BGLT students' emergence, which parallels the modern gay rights movement in America, this monograph

provides an overview of data and theory derived from studying BGLT students and student movements in higher education. Offering context for the ways that previously marginalized students in higher education survive and thrive, this issue: Tells the story of their growing visibility on campus Summarizes collective knowledge to date about BGLT identity development Takes stock of transgender students' distinctive position and experiences in higher education Assesses the role of the BGLT campus resource center in supporting students and advancing equity. This issue develops a picture of the ways that BGLT community activism informs scholarship (and vice versa). In the telling of the movement's stories, these lessons suggest a practice of collaborative transformation for advancing the future of BGLT equality in higher education. This is Volume 37 Issue 4 of the Jossey-Bass publication ASHE Higher Education Report. Each monograph is the definitive analysis of a tough higher education problem, based on thorough research and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports, with experts providing critical reviews of each manuscript before publication.

Beyond Post-Traumatic Stress Sarah Hautzinger 2017-07-05 When soldiers at Fort Carson were charged with a series of 14 murders, PTSD and other "invisible wounds of war" were thrown into the national spotlight. With these events as their starting point, Jean Scandlyn and Sarah Hautzinger argue for a new approach to combat stress and trauma, seeing them not just as individual medical pathologies but as fundamentally collective cultural phenomena. Their deep ethnographic research, including unusual access to affected soldiers at Fort Carson, also engaged an extended labyrinth of friends, family, communities, military culture, social services, bureaucracies, the media, and many other layers of society. Through this profound and moving book, they insist that invisible combat injuries are a social challenge demanding collective reconciliation with the post-9/11 wars.

Africa and its Global Diaspora Jack Mangala 2017-07-12 The book presents a thorough study of the changing landscape of state-diaspora relations in Africa, as well as a robust analysis of diaspora engagement policies being pursued across the continent. As the Africa diaspora strengthens its socio-economic and political clout, countries of origin in Africa have sought to engage their citizens living abroad. Over the past decade, the role of diaspora in the homeland development has become a core tenet of national strategies and policies. Against the backdrop of expanding globalization and deepening regional integration, the book presents a thorough study of the changing landscape of state-diaspora relations in Africa, as well as a robust analysis of diaspora engagement policies being pursued across the continent as states seek to extend rights to and extract obligations from their global citizens.

Serving Library Users from Asia John Hickok 2019-06-12 Asian populations are among some of the fastest growing cultural groups in the US. This book is a comprehensive guide to serving library users from 24 specific Asian countries. It begins with a broad overview of how libraries can better serve Asian communities and then devotes a chapter to each country, providing wealth of valuable resources.

College Students in the United States Kristen A. Renn 2023-07-03 In this book, the authors bring together in one place essential information about college students in the US in the 21st century. Synthesizing existing research and theory, they present an introduction to studying student characteristics, college choice and enrollment patterns, institutional types and environments, student learning, persistence, and outcomes of college. Substantially revised and updated, this new edition addresses contemporary and anticipated student demographics and enrollment patterns, a wide variety of campus environments (such as residential, commuter, online, hybrid), and a range of outcomes including learning, development, and achievement. The book is organized around Alexander Astin's Inputs-Environment-Outputs (I-E-O) framework. Student demographics, college preparation, and enrollment patterns are the "inputs." Transition to college and campus environments are the substance of the "environment." The "outputs" are student development, learning, and retention/persistence/completion. The authors build on this foundation by providing relevant contemporary information and analysis of students, environments, and outcomes. They also provide strategies for readers to project forward in anticipation of higher education trends in a world where understanding "college students in the United States" is an ongoing project. By consolidating foundational and new research and theory on college students, their experiences, and college outcomes in the US, the book provides knowledge to inform policies, programs, curriculum and practice. As a starting point for those

who seek a foundational understanding of the diversity of students and institutions in the US, the book includes discussion points, learning activities, and further resources for exploring the topics in each chapter.

Enough Is Enough Brian O. Hemphill 2023-07-03 Are your violence prevention and mental health efforts on campus coordinated? Are all your campus professionals aware of the system for reporting information about students who may be in distress or at-risk for harming themselves or others? Is the information reviewed and acted on? Recent campus crises have highlighted that campus administrators will be judged by three things: What the campus was doing before the crisis, its immediate response during the crisis, and the follow-up after the crisis. Born out of the call by Virginia Tech's Zenobia Hikes for urgent action to stem the tide of societal violence, and the NASPA "Enough is Enough" campaign (www.EnoughisEnoughcampaign.org) that she inspired, this book provides guidance on how to be proactive in preventing violence, and be prepared to provide a comprehensive response to a crisis. Enough is Enough presents first-hand accounts and experienced counsel from professionals who have lived through a violent incident, and continue to deal with its aftermath. They cover violence, suicide prevention, and mental health promotion in an integrated way, and offer a comprehensive plan to create a campus-wide system for collecting information about students at-risk for self-harm or violence toward others. The authors describe how to develop university-wide emergency plans, using the National Incident Management System template and involving a wide spectrum of campus services; how to create crisis response teams and victim liaison programs; offer recommendations about communication and the management of information; and address institutionally-appropriate and sensitive ways to achieve healing and recovery. The book is addressed to administrators, student affairs, services and mental health professionals, and counselors, on all the nation's campuses, elementary through post-secondary. A Joint ACPA & NASPA Publication

Educating the Top 100 Percent Stephen G. Katsinas 2022-08-23 Educating the Top 100 Percent assesses the decline of higher education funding and offers ambitious policy recommendations to restore the possibility of accessible, affordable education for all. Stephen G. Katsinas, Nathaniel J. Bray, and Martha J. Kanter probe the complex interplay of federal, state, and local policies and illustrate how government actions have, over time, contributed to the long-term slide of US educational attainment. Declining federal and state funding of public higher education has forced institutions to revise their financial models, passing costs directly through to students, to the detriment of prospective students—and the nation. Experts in education policy, the authors point out how the unintended consequences of today's funding model deny an ever-increasing portion of the population important educational and professional opportunities. By providing context for how we arrived at this financial conundrum and analyzing robust quantitative data from national sources, Katsinas and his colleagues offer pragmatic, sustainable, and stable policy options for educating all Americans. The authors provide innovative ideas, key lessons learned, and actionable proposals to fund public higher education. Their top-down federal and bottom-up local and state policy solutions aim to rectify plummeting high school-to-college continuation and college graduation rates. As a result, they present a vision of a brighter economic, cultural, and civic future for educating all Americans. Educating the Top 100 Percent demonstrates how stable, sustainable funding policies can scaffold a better public higher education system for all.

China in Africa Sabella Abidde 2021-02-03 This book examines Sino-African relations and their impact on Africa. It argues that Africa's relationship with China has had a profound impact on key sectors in Africa—economic and political development, the media, infrastructural development, foreign direct investments, loans, debt peonage, and international relations. The authors also analyze the imperialist and neo-colonialist implications of this relationship and discuss the degree to which the relationship is beneficial to Africa.

Internationalisation of Post-1992 UK Universities Peter Brady 2020-03-19 When they gained university status ex-polytechnics expected to be funded on a par with their new university colleagues. This was not the case and a number of government initiatives encouraged them to look overseas to recruit fee-paying students. 'Internationalisation of Post-1992 UK Universities' details how the reaction to these initiatives changed the nature of post-1992 universities. It also looks at how these universities work overseas and how foreign government strategies and policies mean that they are helping competitors and ensuring that foreign students gain a better educational experience than home students.

Robots in Academic Libraries: Advancements in Library Automation Iglesias, Edward 2013-04-30 In recent years, automation has played a vital role in library systems that handle tasks of acquisition, cataloging, serials, and circulation. The automation of these operations has, in turn, minimized the demand for human interaction. *Robots in Academic Libraries: Advancements in Library Automation* provides an overview on the current state of library automation, addresses the need for changing personnel to accommodate these changes, and assesses the future for academic libraries as a whole. This book is essential for library leaders, technology experts, and library vendors interested in the future of library automation and its impact on the decline of human interaction in libraries.

Social Problems Anna Leon-Guerrero 2010-09-16 With an engaging writing style that has made it a popular choice at both 2- and 4-year schools, the Third Edition of Anna Leon-Guerrero's *Social Problems* textbook clearly presents contemporary social problems and addresses their consequences while emphasizing community involvement by both individuals and groups to achieve real solutions. With an overarching focus on social inequalities, this proven text provides a platform for discussion that encourages critical thinking through compelling illustrations, boxed features, learning checks, discussion questions, and online learning tools, all designed to inspire hope rather than simply present a disheartening parade of maladies.

Your Guide to College Success: Strategies for Achieving Your Goals Jane S. Halonen 2012-01-06 YOUR GUIDE TO COLLEGE SUCCESS: STRATEGIES FOR ACHIEVING YOUR GOALS, 7th Edition, supports students as they adjust and learn to thrive in college, providing students with a foundation to become independent learners. The Indispensable University Eugene P. Trani 2010 *The Indispensable University* describes the innovative transformation of institutions of higher education (HEIs) across the world, in response to the emerging realities of the twenty-first century global knowledge-based economy, as well as describes how HEIs are defining many of today's economic realities on a regional level. HEIs continue to drive economic development through their traditional roles of purchaser, employer, real estate developer, workforce developer and community developer. But these roles now must be executed more strategically and collaboratively. Also, the twenty-first century economy offers universities unique opportunities to generate the intellectual and financial capital that drives emerging knowledge-based industries. Case studies are drawn from: urban America; rural America; Europe; the Middle East; and emerging countries. Some of the

topics covered include the following: the role of university presidents as change leaders; the relationship between higher education institutions and the political leadership of cities, states, and nations; successful models of partnerships between higher education and the private sector; and future challenges and opportunities facing the modern university.

Sexual Harassment of Women at Workplaces R. C. Jiloha 2021-07-16 This book seeks to impart comprehensive understanding of the psychological and social impact of sexual harassment.

Purdue at 150 David M. Hovde 2019-05-06 *Purdue at 150: A Visual History of Student Life* by David M. Hovde, Adriana Harmeyer, Neal Harmeyer, and Sammie L. Morris tells Purdue's story through rare images, artifacts, and words. Authors culled decades of student papers, from scrapbooks, yearbooks, letters, and newspapers to historical photographs and memorabilia preserved in the Purdue University Libraries Virginia Kelly Karnes Archives and Special Collections. Many of the images and artifacts included have never been published, presenting a unique history of the land-grant university from the student perspective. *Purdue at 150* is organized by decade, presenting a scrapbook-like experience of viewing over 400 rare photographs, documents, and artifacts alongside critical contextual information. Each chapter provides a decadal historical sketch of Purdue University, offering insight into the institution's unique culture while incorporating campus responses to major national events such as world wars and the Great Depression. Spotlight sections highlight Purdue firsts, including the first graduates of programs, the growth and development of the international student population at Purdue, the creation of significant student organizations, and the foundations of both old and new campus traditions. This curated journey through the personal experiences, spaces, and events of Purdue's history not only celebrates major accomplishments and acknowledges the contributions Purdue has made to society, but it also explores some of the challenges and tragedies that shaped Indiana's land-grant university. As a result, *Purdue at 150* connects the identity and character of the University of 1869 to the University of 2019 and beyond, as told through the stories of its students. Running throughout this journey is the enduring vision of the land-grant institution and its impact on society, as seen through the material culture of Boilermakers from around the world.

International Science and Technology Education Ortwin Renn 2015-06-24 Education in science, technology, engineering and mathematics (STEM) is crucial for taking advantage of the prospects of new scientific discoveries initiating or promoting technological changes, and managing opportunities and risks associated with innovations. This book explores the emerging perspectives and methodologies of STEM education and its relationship to the cultural understanding of science and technology in an international context. The authors provide a unique perspective on the subject, presenting materials and experiences from non-European industrialized as well as industrializing countries, including China, Japan, South Korea, India, Egypt, Brazil and the USA. The chapters offer a wide scope of interpretations and comparative reviews of STEM education by including narrative elements about cultural developments, considering the influence of culture and social perceptions on technological and social change, and applying innovative tools of qualitative social research. The book represents a comprehensive and multidisciplinary review of the current status and future challenges facing STEM education across the world, including issues such as globalization, interdependencies of norms and values, effects on equity and social justice as well as resilience. Overall the volume provides valuable insights for a broad and comprehensive international comparison of STEM philosophies, approaches and experiences.

Excellence for All Jack Schneider 2010 *Excellence For All: American Education Reform, 1983-2008* examines the history of school reform in the United States over the past quarter-century. Specifically, the work examines an approach to educational change best characterized by the phrase "excellence for all"—an equity-focused policy phenomenon uniquely situated for the policymaking context of the late twentieth and early twenty-first centuries. The idea of promoting excellence for all students united a broad enough coalition to pursue a truly national reform effort and captured the imaginations of leaders in state and local government, at philanthropic foundations, in colleges and universities, and in school districts across the country. Led by a corps of self-styled educational entrepreneurs aggressively pursuing reforms that they could take "to scale," the movement sought to remake the American high school piece by piece. The dissertation examines this reform movement through the nation's three largest districts—New York, Chicago, and Los Angeles—and through three particular change efforts: a physical plant reform (the small schools

movement), a personnel reform (Teach For America), and a curricular reform (the Advanced Placement Program). The work aims to establish the ways in which this most recent era of school reform represented a

departure from previous reform eras, strives to explain the movement's broad appeal, and ultimately, aims to understand its shortcomings by exploring the assumptions underlying the excellence for all approach and the tradeoffs required by it.
