Learning Outcomes, Academic Credit and Student Mobility Christine Arnold 2020-10-30 There is increasing interest in the use of learning outcomes in postsecondary education, and deliberations have surfaced with regard to their potential to serve as a tool for advancing credit transfer. Learning Outcomes, Academic Credit, and Student Mobility assesses the conceptual foundations, assumptions, and implications of using learning outcomes for the purposes of postsecondary credit transfer and student mobility. Through a critical review of current approaches to the use of learning outcomes across national and international jurisdictions, scholars and practitioners in postsecondary education provide a multivalent examination of their potential impacts in the unique context of Ontario and recommend future directions for the system. The collected works are the culmination of a multi-year study entitled Learning Outcomes for Transfer, funded by the Ontario Council on Articulation and Transfer. Contributions are authored by prominent international scholars across countries with significant outcomes-based experience and education reforms (South Africa, the United States, Australia, Europe, and the United Kingdom) and an Ontario research consortium comprising college and university experts working to advance student pathways.

Directory of Research Grants 2008 Schoolhouse Partners LLC 2008-05 Volume 2 of 2 - With more than 5,100 listings of grants programs from 1,880 sponsors, the Directory of Research Grants is a comprehensive directory of grants available to researchers in every field of study. The directory has a broad focus, featuring grants for basic research, equipment acquisition, building construction/renovation, fellowships, and 23 other program types. Government grants include CFDA, NSF and NIH program numbers. Each record includes grant title, description, requirements, amount, application deadline, contact information (phone, fax and email), web address, sponsor name and address, and samples of awarded grants (when available). Printed in two volumes, each with extensive indexes - subject, program type and geographic to help you to

identify the right program quickly.

Guide to Architecture Schools 2003

Helping Sophomores Succeed Mary Stuart Hunter 2009-10-02 Helping Sophomores Succeed offers an in-depth, comprehensive understanding of the common challenges that arise in a student's second year of college. Sponsored by the University of South Carolina's National Resource Center for The First-Year Experience® and Students in Transition, this groundbreaking book offers an examination of second-year student success and satisfaction using both quantitative and qualitative measures from national research findings. Helping Sophomores Succeed serves as a foundation for designing programs and services for the second-year student population that will help to promote retention, academic and career development, and personal transition and growth. Praise for Helping Sophomores Succeed "Lost, lonely, stressed, pressured, unsupported, frequently indecisive, and invisible, many sophomores fall off the radar of campus educators at a time when they may most be seeking purpose, meaning, direction, intellectual challenge, and intellectual capacity building. The fine scholars who focused educators on the first-year and senior transitions have done it again? a magnificent book to focus on the sophomore year!" ?Susan R. Komives, College Student Personnel Program, University of Maryland "For years, student-centered institutions have front-loaded resources to promote student success in the first college year. This volume is rich with instructive ideas for how to sustain this important work in the second year of college." ?George D. Kuh, Chancellor's Professor and director, Indiana University Center for Postsecondary Research "A pioneering work, this brilliant text explores in practical and meaningful ways the all but neglected sophomore-year experience, when students face critical choices about their major, their profession, their life purpose." ?Betty L. Siegel, president emeritus, Kennesaw State University? "All members of the campus community?faculty, student affairs educators, staff, and students?will benefit from learning about the unique challenges of the second college year. The

book provides research and best practices to help educators and students craft an integrated, comprehensive approach to helping second-year students succeed." ?Marcia Baxter Magolda, distinguished professor, Educational Leadership, Miami University The National Resource Center for The First-Year Experience® and Students in Transition supports and advances efforts to improve student learning and transitions into and through higher education by providing opportunities for the exchange of practical, theory-based information and ideas.

Learning Technologies for Transforming Large-Scale Teaching, Learning, and Assessment Demetrios Sampson 2019-05-24 This volume provides a contemporary glance at the drastically expanding field of delivering large-scale education to unprecedented numbers of learners. It compiles papers presented at the CELDA (Cognition and Exploratory Learning in the Digital Age) conference, which has a goal of continuing to address these challenges and promote the effective use of new tools and technologies to support teaching, learning and assessment. Given the emerging global trend to exploit the potential of existing digital technologies to improve the teaching, learning and assessment experiences for all learners in real-life contexts, this topic is a unifying theme for this volume. The book showcases how emerging educational technologies and innovative practices have been used to address core global educational challenges. It provides state-of-the-art insights and case studies of exploiting innovative learning technologies, including Massive Open Online Courses and educational data analytics, to address key global challenges spanning from online Teacher Education to large-scale coding competence development. This volume will be of interest to academics and professional practitioners working in the area of digital technology integration in teaching, learning and assessment, as well as those interested in specific conference themes (e.g., designing and assessing learning in online environments, assessing learning in complex domains) and presenters, invited speakers, and participants of the CELDA conference.

Undergraduate Catalog University of Michigan--Dearborn 2011

High Value Manufacturing: Advanced Research in Virtual and Rapid Prototyping Paulo Jorge da Silva Bartolo 2013-09-16 High Value Manufacturing is the result of the 6th International Conference on Advanced Research in Virtual and Rapid Prototyping, held in Leiria, Portugal, October 2013. It contains current contributions to the field of virtual and rapid prototyping (V&RP) and is also focused on promoting better links between industry and academia. This volume comprises a collection of more than 110 reviewed papers which cover a wide range of topics, such as Additive and Nano Manufacturing Technologies, Biomanufacturing, Materials, Rapid Tooling and Manufacturing, CAD and 3D Data Acquisition Technologies, Simulation and Virtual Environments, and novel applications. High Value Manufacturing is intended for engineers, designers and manufacturers who are active in the fields of mechanical, industrial and biomedical engineering.

Information Literacy Education of Higher Education in Asian Countries Chao-Chen Chen 2023-04-18 This book focuses on information literacy in higher education from Asian countries. It explores the changing concepts, philosophies, learning environments, and technological environments of information literacy and discusses how information literacy education in universities should be carried out in the context of the information literacy framework. It also analyses the research focus and trends of information literacy education in universities in the past ten years worldwide and Asia by using the bibliometric method as well as the information literacy education models of universities in Asian countries. In addition, this book also explains the current status of information literacy education and related issues in Taiwan, Japan, Hong Kong, Malaysia, Thailand and Vietnam. The target audience of this book is mainly university librarians, school librarians, the faculty and students of library and information sciences, information education and technology education related departments worldwide.

PHOTOVIDEOi 2007-03 A local Singaporean magazine dedicated to photography and videography.

Southeast European Studies in a Globalizing World Christian Promitzer 2014 Since the early 1990s, Southeast European studies have undergone profound changes, being shaped by the wars of Yugoslav succession and the ramifications of post-socialism, coupled with democratic deficiencies, which characterize most of Southeast Europe. The countries which it encompasses rest uneasily on the periphery of the developed variant of Western capitalism, but they have nonetheless to contend with the challenges of adjusting to a market economy. The imprint of these contexts on academic research has led to a discussion of the role of Southeast European studies. It is the task of this volume to summarize and raise awareness of this discussion. (Series: Studies on South East Europe - Vol. 16) [Subject: European Studies, Sociology, Politics]

Medical Education and Ethics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2016-09-27 As the healthcare industry continues to expand, a higher volume of new professionals must be integrated into the field. Providing these professionals with a quality education will likewise ensure the further progress and advancements in the medical field. *Medical Education and Ethics: Concepts, Methodologies, Tools, and Applications* presents a compendium of contemporary research on the educational practices and ethical considerations in the medical industry. This multi-volume work contains pedagogical frameworks, emerging trends, case studies, and technological innovations essential for optimizing medical education initiatives. This comprehensive publication is a pivotal resource for medical professionals, upper-level students, researchers, and practitioners.

Principles, Practices, and Creative Tensions in Progressive Higher Education Katherine Jelly 2017-03-23 In this multi-faceted case study of one progressive institution of adult higher education, the editors and contributors to the volume lay out significant challenges confronting not just non-traditional post-secondary colleges and universities but all institutions of higher education in today's rapidly changing context. Contending that nontraditional institutions are especially challenged in these turbulent times, they argue that these organizations' distinctive academic programs are among the most threatened in the landscape of higher education today. The 19 essays that make up this volume highlight and examine key creative tensions, rich interplays of emphases and values in higher education, in order to illuminate and address more intentionally the questions that we must address: Can we make constructive use of these tensions? Can we recognize what is at stake? And can we chart a course that will both respond innovatively to rapid change and sustain a vision and the purposes and principles on which that vision rests? Taken as a whole, this volume sheds light on the questions and creative tensions that can, with thoughtful attention, help to keep an alternative, progressive vision of adult higher education alive.

Reports of Cases Heard and Determined in the Supreme Court of the State of New York Marcus Tullius Hun 1891

Enterprise Systems Education in the 21st Century Targowski, Andrew 2006-08-31 "This book presents methods of reengineering business curricula in order to use ES solutions. It also helps ES vendors understand the higher education environment so they can support college and university programs"--Provided by publisher.

English Legal System in Context 6e Fiona Cownie 2013-07-25 This title has been written with a very simple aim in mind - to provide a text which will enable the English legal system to be taught as an interesting, intellectually stimulating course.

Children's Rights: New Issues, New Themes, New Perspectives Michael Freeman 2018-03-06 This collection of essays by a variety of scholars, compiled to celebrate the silver anniversary of The International Journal of Children's Rights, builds on work already in the literature to reveal where we are now at and how the law concerned with children is reacting to new developments. New, or relatively new subject matter is explored, such as film classification, intersex genital mutilation, the right to development. Rights within the context of sport are given an airing. We are offered new perspectives on discipline, on the significance of "rights flowing downhill," on the so-called six "General Principles." The uses to which the CRC is put in legal reasoning in some legal systems is critically examined. Though not intended as an audit, the collection offers a fascinating image of where the field of children's right is at now, the progress that has been made, and what issues will require work in the future.

Colleges in New York 2007 Peterson's Guides Staff 2006-10-09 Detailed listings of accredited colleges in New York.

Online Learning in Music Judith Bowman 2014 With a focus on higher education, this book offers insights into the growth of online learning in music, perspectives on theoretical models for design and development of online and blended courses, and principles for good practice in online music teaching and learning.

Resources in Education 2001

Educational Leadership and Administration: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2016-10-12 The delivery of quality education to students relies heavily on the actions of an institution's administrative staff. Effective leadership strategies allow for the continued progress of modern educational initiatives. *Educational Leadership and Administration: Concepts, Methodologies, Tools, and Applications* provides comprehensive research perspectives on the multi-faceted issues of leadership and administration considerations within the education sector. Emphasizing theoretical frameworks, emerging strategic initiatives, and future outlooks, this publication is an ideal reference source for educators, professionals, school administrators, researchers, and practitioners in the field of education.

Franco-British Academic Partnerships Philippe Lane 2011-07-08 The steady increase in joint programmes and qualifications offered by UK and French universities is a cause for celebration. But language constraints, financial pressures and political uncertainty present real obstacles to continued expansion. How are these to be overcome? And how can higher education institutions on either side of the Channel help each other to realise the enormous potential of Franco-British partnerships? *Franco-British Academic Partnerships: The Next Chapter* is a valuable opportunity not only to take stock of intensifying bilateral cooperation in the higher education sector, but also to share experience and best practice, and, hopefully, to identify some new initiatives and areas for collaboration. Boasting contributions from leading politicians and higher education managers, alongside essays from distinguished international scholars, the book will be required reading for academics and university leaders.

Peterson's Colleges in New York Peterson's (Firm : 2006-) 2009 This annually updated and comprehensive guide helps students and parents compare colleges within a specific geographic area (New York). Accredited regional colleges and universities are profiled with the latest information on financial aid, admissions, and student body statistics.

EBOOK: Gender and the Changing Face of Higher Education: A Feminized Future? Carole Leathwood 2008-12-16 A notable feature of higher education in many countries over the last few decades has been the dramatic rise in the proportion of female students. Women now outnumber men as undergraduate students in the majority of OECD countries, fuelling concerns that men are deserting degree-level study as women overtake them both numerically and in terms of levels of achievement. The assertion is that higher education is becoming increasingly 'feminized' - reflecting similar claims in relation to schooling and the labour market. At the same time, there are persistent concerns about degree standards, with allegations of 'dumbing down'. This raises questions about whether the higher education system to which more women have gained access is now of less value, both intrinsically and in terms of labour market outcomes, than previously. This ground-breaking book examines these issues in relation to higher education in the UK and globally. It provides a thorough analysis of debates about 'feminization', asking: To what extent do patterns of participation continue to reflect and (re)construct wider social inequalities of gender, social class and ethnicity? How far has a numerical increase in women students challenged the cultures, curriculum and practices of the university? What are the implications for women, men and the future of higher education? Drawing on international and national data, theory and research, *Gender and the Changing Face of Higher Education* provides an accessible but nuanced discussion of the 'feminization' of higher education for postgraduates, policy-makers and academics working in the field.

Contemporary Approaches to Dissertation Development and Research Methods Storey, Valerie A. 2016-06-16 Uncovering the best methods for conducting and writing about research is vital to members of the academic community, especially to those just beginning their careers. In this regard, graduate and post-graduate degree programs are crucial in ensuring that future academic and professional progress will continue. *Contemporary Approaches to Dissertation Development and Research Methods* is a pivotal reference source that focuses on current models used for doctoral dissertations and how these techniques impact future research and knowledge in various scholarly fields. Featuring innovative perspectives on the design and function of doctoral programs, this book is ideally designed for practitioners, researchers, and academicians.

Rochester Institute of Technology Dane R. Gordon 2007 Rochester Institute of Technology's story now encompasses some 175 years of commitment to higher education. Almost uniquely among American universities, RIT has focused on educating a skilled workforce to support advancements in the industrialization and modernization of America. From its beginnings in 1829, when it harnessed the energy of a young city in upstate New York, through stunningly effective mergers and nimble responses to new technologies, RIT has evolved into a respected model in innovative higher education. In this new and enlarged edition of his original history of RIT (1982), Professor Gordon brings the university's fascinating chronicle up to date. RIT has enjoyed tremendous growth over the past 25 years, and readers will enjoy anecdotes on student life, insights into major initiatives, and an objective look at the tough decisions that have guided RIT into the company of the highest-ranking academic institutions in the United States. This book is of certain interest for urban and technological historians, college administrators nationwide, and especially RIT's own growing community of students, employees, supporters, and alumni.

Handbook of Research on Educational Technology Integration and Active Learning Keengwe, Jared 2015-05-31 As today's teachers prepare to instruct a new generation of students, the question is no longer whether technology should be integrated into the classroom, but only "how?" Forced to combat shorter attention spans and an excess of stimuli,

teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods. The Handbook of Research on Educational Technology Integration and Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience. Highlighting the advancements of ubiquitous computing, authentic learning, and student-centered instruction, this book is an essential reference source for educators, academics, students, researchers, and librarians.

Proceedings of AC 2018 in Prague Group of Authors 2018-08-07 International Academic Conferences in Prague, August 10 - 13, 2018

Radical Pedagogies Beatriz Colomina 2022-05-31 Experiments in architectural education in the post-World War II era that challenged and transformed architectural discourse and practice. In the decades after World War II, new forms of learning transformed architectural education. These radical experiments sought to upend disciplinary foundations and conventional assumptions about the nature of architecture as much as they challenged modernist and colonial norms, decentered building, imagined new roles for the architect, and envisioned participatory forms of practice. Although many of the experimental programs were subsequently abandoned, terminated, or assimilated, they nevertheless helped shape and in some sense define architectural discourse and practice. This book explores and documents these radical pedagogies and efforts to defy architecture's status quo. The experiments include the adaptation of Bauhaus pedagogy as a means of "unlearning" under the conditions of decolonization in Africa; a movement to design for "every body," including the disabled, by architecture students and faculty at the University of California, Berkeley; the founding of a support network for women interested in the built environment, regardless of their academic backgrounds; and a design studio in the USSR that offered an alternative to the widespread functionalist approach in Soviet design. Viewed through their dissolution and afterlife as well as through their founding stories, these projects from the last century raise provocative questions about architecture's role in the new century.

Soft Skills for the Effective Lawyer Randall Kiser 2017-08-07 This book enables attorneys and law students to enhance their professional performance through the key soft skills of self-awareness, self-development, social proficiency, wisdom, leadership, and professionalism. It serves as both a map and a vehicle for developing the skills essential to self-knowledge and fulfillment, organizational respect and accomplishment, client satisfaction and appreciation, and professional improvement and distinction.

The Plight of Religious Minorities United States. Congress. House. Committee on International Relations. Subcommittee on Africa, Global Human Rights, and International Operations 2006

Revolutionizing Arts Education in K-12 Classrooms through Technological Integration Lemon, Narelle 2015-04-30 Educational technologies are becoming more commonplace across the K-12 curriculum. In particular, the use of innovative digital technology is expanding the potential of arts education, presenting new opportunities—and challenges—to both curricular design and pedagogical practice. Revolutionizing Arts Education in K-12 Classrooms through Technological Integration brings together a variety of perspectives, research, and case studies that emphasize a pedagogical awareness of diverse learning styles, while highlighting issues of ethics and equality across the educational landscape. This timely publication is aimed at K-12 arts educators leading classrooms focusing on dance, drama, media, music, and the visual arts, as well as pre-service teachers, museum and gallery educators, policymakers, and designers of academic curricula.

New Directions for Computing Education Samuel B. Fee 2017-04-17 Why should every student take a computing course? What should be the content of these courses? How should they be taught, and by whom? This book addresses these questions by identifying the broader reaches of computing education, problem-solving and critical thinking as a general approach to learning. The book discusses new approaches to computing education, and considers whether the modern ubiquity of computing requires an educational approach that is inherently interdisciplinary and distinct from the traditional computer science perspective. The alternative approach that the authors advocate derives its mission from an intent to embed itself within an interdisciplinary arts and science context. An interdisciplinary approach to computing is compellingly valuable for students and educational institutions alike. Its goal is to support the educational and intellectual needs of students with interests in the entire range of academic disciplines. It capitalizes on students' focus on career development and employers' demand for technical, while also engaging a diverse student body that may not possess a pre-existing interest in computing for computing's sake. This approach makes directly evident the applicability of computer science topics to real-world interdisciplinary problems beyond computing and recognizes that technical and computational abilities are essential within every discipline. The book offers a valuable resource for computer science and computing education instructors who are presently re-thinking their curricula and pedagogical approaches and are actively trying new methods in the classroom. It will also benefit graduate students considering a future of teaching in the field, as well as administrators (in both higher education and high schools) interested in becoming conversant in the discourse surrounding the future of computing education.

F & S Index United States Annual 2006

Encyclopedia of E-Leadership, Counseling and Training Wang, Victor C.X. 2011-08-31 Encyclopedia of E-Leadership, Counseling and Training offers an in-depth description of key terms and concepts related to different themes, issues, and trends in educational leadership, counseling, and technology integration in modern universities and organizations worldwide. This three volume work serves as an exhaustive compendium of expertise, research, skills, and experiences. Authors with a background in education, leadership, counseling, management, human resource development, or adult education have helped to encourage the education and training of potential leaders with this scholarly work.

Child Protection and Obscenity Enforcement Act of 1988 United States. Congress. House. Committee on the Judiciary. Subcommittee on Crime 1989

Professional Learning in the Work Place for International Students Georgina Barton 2017-06-28 This book shares a range of examples where international students have undertaken a work placement, practicum, internship or participated in work integrated learning. Contributions reflect on the successes and challenges that this particularly diverse group of students experience when undertaking work placement programs in a variety of disciplines, such as education, engineering and health. The book explores these experiences via three main conceptualisations: 1. Internationalisation and interculturalisation – including the diversity of international student cohorts and the associated policy, practices and assessment related to international students in higher education; 2. Multi-socialisation – of international students with a focus on new cultural contexts, professional learning and disciplinarity; and 3. Reflection and reflective practice – acknowledging that for improvement and change to occur those involved need to reflect on current and possible future practice. A working model of effective practice is introduced which can inform prospective international students, their mentors/supervisors, work placement coordinators and other relevant university staff.
