**Online Communication** Andrew F. Wood 2004-09-22 Online Communication provides an introduction to both the technologies of the Internet Age and their social implications. This innovative and timely textbook brings together current work in communication, political science, philosophy, popular culture, history, economics, and the humanities to present an examination of the theoretical and critical issues in the study of computer-mediated communication. Continuing the model of the best-selling first edition, authors Andrew F. Wood and Matthew J. Smith introduce computer-mediated communication (CMC) as a subject of academic research as well as a lens through which to examine contemporary trends in society. This second edition of Online Communication covers online identity, mediated relationships, virtual communities, electronic commerce, the digital divide, spaces of resistance, and other topics related to CMC. The text also examines how the Internet has affected contemporary culture and presents the critiques being made to those changes. Special features of the text include: \*Hyperlinks—presenting greater detail on topics from the chapter \*Ethical Inquiry—posing questions on the nature of human communication and conduct online \*Online Communication and the Law—examining the legal ramifications of CMC issues Advanced undergraduates, graduate students, and researchers interested in the field of computer-mediated communication, as well as those studying issues of technology and culture, will find Online Communication to be an insightful resource for studying the role of technology and mediated communication in today's society.

**Reflecting on India's Development** NILERD 2018-09-20 The book assesses the development experience by reflecting on a number of aspects, such as growth in relation to employment, regional imbalances and rural-urban distribution. Further, it examines educational attainment and human capital formation issues in the context of the skill shortages the country is facing, and analyses social inequality, including gender, and

evaluates a number of empowerment strategies. Lastly, it critically assesses the effectiveness of health services by examining case studies of on-going sanitation, family planning and reproductive health programmes. Presenting both quantitative and qualitative approaches, the papers utilise rare databases that are usually not available in the public domain to reflect on the country's development experience. The book revisits many development concerns, particularly inclusiveness aspects, through an in-depth analysis. It covers three major areas related to (a) employment, (b) education and skill and (c) social concerns and issues related to health services. The book will be an important resource not only for researchers but also for policy makers and those involved in capacity development in these areas.

**Enterprise Management Control Systems in China** Xianzhi Zhang 2014-04-30 This book provides an exhaustive view of China's Management Control Systems (MCS), examining the development of theory and practice and presenting a framework that integrates China's unique enterprise regulations, corporate culture and managerial mindset into management control systems. The work offers detail about the effects of China's economic reforms on management control in Chinese enterprises and insightful comparisons with Western theory and Western examples. Readers will discover important themes and the evolution of theory in MCS, including discussions of frameworks and the links between management control and economics, management, accounting, cybernetics and system theory. Early chapters explore management control in Chinese enterprises during the period, especially the demands of (guidance, enforcement and external regulation) and the demand for (stakeholders, managers, investors) management control. The work moves on to explore Western management control theory and research, including an examination of the evolution of internal control theory. The author presents detailed perspectives on the elements of management control systems and introduces masterful new ideas and methods through four general control models and ten critical elements in the management control process. A view of management control in various different types of enterprise is presented, from special enterprises and small to medium enterprises to non-profit organizations. The standards for enterprise management control are explored. This work is a valuable practical guide for corporate management teams who wish to develop and execute their own internal control strategies. It will also provide foreign researchers, policy-makers and practitioners with a new perspective on Chinese management control experiences.

**Advanced Combustion Techniques and Engine Technologies for the Automotive Sector** Akhileendra Pratap Singh 2019-10-10 This book discusses the recent advances in combustion strategies and engine technologies, with specific reference to the automotive sector. Chapters discuss the advanced combustion technologies, such as gasoline direct ignition (GDI), spark assisted compression ignition (SACI), gasoline compression ignition (GCI), etc., which are the future of the automotive sector. Emphasis is given to technologies which have the potential for utilization of alternative fuels as well as emission reduction. One special section includes a few chapters for methanol utilization in two-wheelers and four wheelers. The book will serve as a valuable resource for academic researchers and professional automotive engineers alike.

**Macropprudential Policy** International Monetary Fund 2011-10-01 This paper provides the most comprehensive empirical study of the effectiveness of macropprudential instruments to date. Using data from 49 countries, the paper evaluates the effectiveness of macropprudential instruments in reducing systemic risk over time and across institutions and markets. The analysis suggests that many of the most frequently used instruments are effective in reducing pro-cyclicality and the effectiveness is sensitive to the type of shock facing the financial sector. Based on these findings, the paper identifies conditions under which macropprudential policy is most likely to be effective, as well as conditions under which it may have little impact.

**Substantial Relations** Sandra Bärnreuther 2021-12-15 Substantial Relations examines global reproductive medicine in India, focusing on in vitro fertilization. Since the 1970s, India has played a central but shifting role in shaping global reproductive medicine—from a provider of raw material, to a producer of knowledge and technology, to a creator of a thriving medical market that attracts patients from all over the world. Relying on archival material and oral history, Substantial Relations traces the path of this transnational historical trajectory. This book also examines the contemporary making of IVF in Delhi. Drawing on ethnographic research in homes, hospitals, and laboratories, Sandra Bärnreuther provides deep insights into the intricacies of clinical life and everyday experience by depicting IVF users' quest for offspring and their fears of establishing unwanted ties, as well as the minute engagements of clinicians and laboratory staff with reproductive substances. Thinking through substances—metaphorically and materially—Sandra Bärnreuther provides a novel and rich analysis of the various relations that the burgeoning IVF sector in India has relied on and generated. Substantial Relations contributes to a broader understanding of reproductive medicine as a global phenomenon constantly in the making, situating India in the midst of, rather than peripheral to, this process.
